

### Key investor information for investors in Switzerland

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## DWS Invest Global Emerging Markets Equities

Share class: TFCH (P), ISIN: LU1876537546, Security code: DWS2X5, Currency: EUR

a sub-fund of DWS Invest. The management company is DWS Investment S.A., a member of the DWS Group.

### Objectives and investment policy

The fund is actively managed. The fund is managed in reference to a benchmark. The objective of the investment policy is to achieve sustained capital appreciation that exceeds the benchmark (MSCI Emerging Markets TR net). In order to achieve this, the fund invests primarily in equities of companies registered in emerging markets countries or companies that conduct their principal business activity in emerging markets countries or which, as holding companies, hold primarily interest in companies registered in emerging markets countries. A company is viewed as having its principal business activity in emerging-market countries if a significant part of its earnings or revenues is generated there. Emerging markets are countries listed in the MSCI Emerging Markets Index or listed in the Standard & Poor's Emerging Markets Database (EMDB). Further, countries which are listed as low or middle income (including both lower middle and higher middle income) by the World Bank will be considered as Emerging Markets even if such countries are neither listed in the MSCI Emerging Markets Index nor in the EMDB but must not be included in the MSCI World Index. In this context, the selection of individual investments is the responsibility of the fund management. The majority of the fund's securities or their issuers

are expected to be components of the benchmark. The fund management will use its discretion to invest in securities and sectors that are not included in the benchmark in order to take advantages of specific investment opportunities. The portfolio is not necessarily expected to have a similar weighting to the benchmark. In regard to its benchmark, the sub-fund positioning can deviate significantly (e.g. by a positioning outside of the benchmark as well as a significant underweighting or overweighting) and the actual degree of freedom is typically relatively high. A deviation generally reflects the fund manager's evaluation of the specific market situation, which may lead to a defensive and closer or a more active and wider positioning compared to the benchmark. Despite the fact that the fund aims to outperform the benchmark, the potential outperformance might be limited depending on the prevailing market environment (e.g. less volatile market environment) and actual positioning versus the benchmark. The currency of the fund is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis.

### Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified

in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high. The following risks could be of particular significance for the fund: The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases. The fund invests in emerging markets. Investing in assets from the emerging markets generally entails a greater risk (potentially including considerable legal, economic and political risks) than investing in assets from the markets of established countries.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

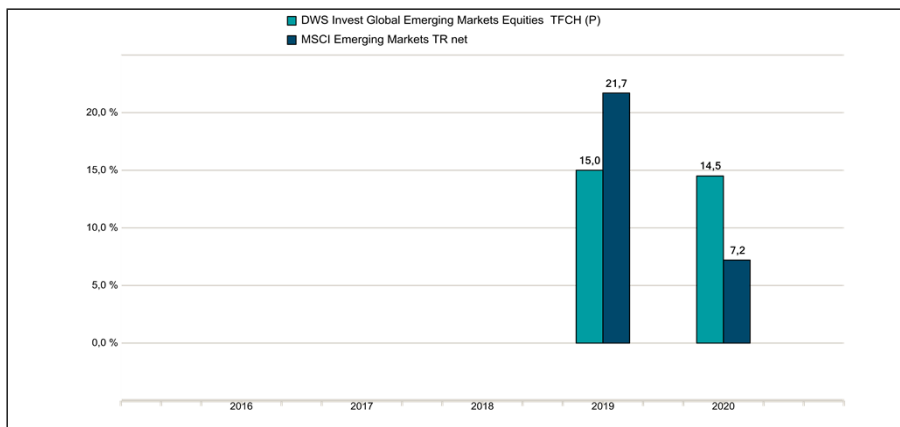

### Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charges	0.78 %
Charges taken from the fund under certain specific conditions	
Performance fee	None
Securities lending fees	0.01 %

The ongoing charges figure is based on expenses for the fiscal year ending 31.12.2020. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any. Additional information on costs can be found in the cost section(s) of the prospectus.

### Past performance

Past performance is not a reliable indicator of future performance. All costs and fees that were withdrawn from the TFCH (P) share class of DWS Invest Global Emerging Markets Equities were deducted during the calculation. The TFCH (P) share class of DWS Invest Global Emerging Markets Equities was launched in 2018.
