

Key investor information for investors in Switzerland

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

DWS Invest ESG Qi LowVol World

Share class: FC EB, ISIN: LU1236797764, Security code: DWS2AP, Currency: EUR

a sub-fund of DWS Invest. The management company is DWS Investment S.A., a member of the DWS Group.

Objectives and investment policy

The fund is actively managed. The fund is not managed in reference to a benchmark. The Objective of the investment policy is to achieve long term sustainable capital appreciation. In order to achieve this, the fund invests globally in equities of international issuers. An attractive risk/reward ratio is important in the composition of the portfolio. In addition, stocks are selected according to the principle of spreading risks (broad portfolio). This involves selecting a combination of equities that are likely to exhibit low price fluctuation. The focus is not on maximizing returns in comparison with the broader equity market. Investment decisions in relation to the choice of equities are based on scientifically sound

actuarial analyses. When selecting investments, environmental and social aspects and the principles of good corporate governance (ESG aspects) are taken into consideration alongside the financial performance. In this context, the selection of individual investments is the responsibility of the fund management. The currency of the fund is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis. The Company may, however, suspend or restrict the redemption if extraordinary circumstances appear to make this necessary, taking into account the interests of the investors.

Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a

fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 5 because its share price fluctuates comparatively strongly and the likelihood of both losses and gains is therefore relatively high. The following risks could be of particular significance for the fund: There is the risk of loss resulting from the inadequacy or failure of internal systems, processes or people and as a result of external events.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
