## **GENERAL INFORMATION**

---

### **Background to the ICAV**

DWS Invest (IE) ICAV (the “ICAV”) was registered in Ireland pursuant to the Irish Collective Asset-management Vehicles Acts 2015 and 2020 (the “Acts”), on 28 November 2022 under registration number C194848. The ICAV was incorporated under an Instrument of Incorporation, pursuant to the Acts, and was registered with the Central Bank of Ireland (the “Central Bank”) on 12 July 2019. The ICAV is authorised by the Central Bank of Ireland (the “Central Bank”) as an undertaking for collective investment in transferable securities (“UCITS”) pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (“UCITS Regulations”). The ICAV is organised in the form of an umbrella fund with segregated liability between each of the funds offered (collectively the “Funds” and individually “sub-fund” or “Fund”). Each fund offered by the ICAV will have a distinct portfolio of investments. The sole objective of the ICAV is the collective investment of its Funds in either or both transferable securities and other liquid financial assets of capital raised from the public and which operates on the principle of risk spreading, in accordance with the UCITS Regulations and the instrument of incorporation. References to statutes, regulations and laws shall include any amendments thereto. All capitalised terms used but not defined herein shall have the meaning ascribed hereto in the ICAV’s prospectus dated 1 December 2023 (the “Prospectus”).

### **Schedule of Sub-Funds**

As at 30 June 2025, the ICAV has established nine sub-funds namely DWS Qi Global AC Equity Fund, which launched on 23 October 2019, DWS Noor Precious Metals Securities Fund, which launched as a result of a merger on 28 May 2021, Xtrackers Global Aggregate Corporate Bond 1-10 Index Fund, which launched on 1 March 2023 and DWS Customised Global Investment Grade Bond Fund, which launched on 18 April 2024 (together the “Funds” and individually “sub-fund” or “Fund”). Xtrackers MSCI World UCITS Fund, Xtrackers MSCI China A UCITS Fund, Xtrackers MSCI ACWI UCITS Fund, Xtrackers MSCI USA UCITS Fund and Xtrackers S&P 500 UCITS Fund are approved but not launched as at 30 June 2025 and as such no information for these Funds has been presented in the financial statements.

The manager of the ICAV is DWS Investment S.A. (the “Manager”), which in turn has appointed DWS Investment GmbH as investment manager (the “Investment Manager”) of the Funds. The Investment Manager has appointed DWS International GmbH as sub-investment manager of the DWS Qi Global AC Equity Fund and DWS Investment Management Americas Inc. as the sub-investment manager of the DWS Noor Precious Metals Securities Fund (DWS International GmbH and DWS Investment Management Americas Inc. each a sub-investment manager and together being, the “Sub-Investment Managers”).

Shares representing interests in different Funds of the ICAV may be issued from time to time by the Directors. Within each Fund, the Directors may issue Shares of more than one Class. All Shares of each Class will rank *pari passu* save as provided for in the relevant Supplement. A separate portfolio of assets will be maintained for each Fund (and accordingly not for each Class of Shares) and will be invested in accordance with the investment objective and strategies applicable to the particular Fund. As the ICAV has segregated liability between its Funds, any liability incurred on behalf of or attributable to any Fund shall be discharged solely out of the assets of that Fund.

### **Investment objective and policy**

#### **DWS Qi Global AC Equity Fund**

The investment objective of the Fund is to achieve long-term capital appreciation in excess of the MSCI ACWI Index (the “Benchmark”). In order to achieve the investment objective, the Fund will primarily invest in equities of large and mid-cap companies which are either listed and/or domiciled in or have meaningful economic exposure to both developed markets and emerging markets. With the exception of permitted investments in unlisted securities, the Fund’s investments will be listed on Regulated Markets, and may be selected without restrictions to geographical, industrial or sectoral exposure. Such investments may include China A-Shares, which the Fund may invest in directly through Stock Connect as further described in the Prospectus. Individual stocks are selected by the Sub-Investment Manager of the Fund, using a proprietary and dynamic multi-factor allocation strategy designed by the DWS Quantitative investments (Qi) group within the Sub-Investment Manager. The strategy seeks to select and weight investments according to criteria typical of fundamental analysis and technical analysis taking into account a balance between opportunity and risk. Fundamental analysis involves analysis of companies’ balance sheet data and valuation metrics, whereas technical analysis involves forecasting the direction of stock prices by analysing historical market price data.

The investment objective of the Fund is to track the performance before fees and expenses of an index that provides exposure to the global investment grade fixed-rate debt markets, denominated in Euro and US Dollars across developed market countries. If there is no official rating, an internal rating will be applied in accordance with DWS internal guidelines. Up to 5% of the Fund's net assets may be held in debt securities that have a below investment grade rating, as defined as BB+ and below, due to ratings downgrade after initial date of acquisition. **Sharia Investment Guidelines - DWS Noor Precious Metals Securities Fund**

DWS Noor Precious Metals Securities Fund undertakes its investment activities in accordance with the Sharia Investment Guidelines. As a consequence, this may mean that the Fund may under-perform, when compared to other investment funds with comparable investment objectives that do not seek to adhere to Islamic investment criteria (for example the inability to invest in interest bearing investment securities and the amount of any donations to charities made up of cash dividends which have been cleansed). The Sharia Investment Guidelines may require the Fund to dispose of investments in circumstances that are less advantageous than might otherwise be the case. In particular, DWS Investment GmbH (the "Investment Manager") will receive the Sharia Supervisory Board's instructions through Khalij Islamic (BVI) Limited (the "Sharia Advisor"), as set out in the Sharia Advisory Agreement executed between the Fund, the Investment Manager and the Sharia Advisor.

Pursuant to such instructions by the Sharia Advisor, the Investment Manager and DWS Investment Management Americas Inc., the Sub-Investment Manager of the Fund, will, for instance, not be allowed to invest in securities and other financial instruments which, in the opinion of the Sharia Supervisory Board of the Sharia Advisor, are not or are no longer, in compliance with the Sharia Investment Guidelines. Similarly, cash balances held by the Fund from time to time may be deposited on terms which shall grant no return on the sum deposited to the benefit of the sub-fund.

Although the Fund intends to observe the Sharia Investment Guidelines at all times, no absolute assurance can be given, as there may be occasions when the Fund's investments do not fully comply with such criteria for factors outside the control of the Fund. The Depositary shall not be responsible for monitoring compliance with the Sharia Investment Guidelines.

**Purification of Income - DWS Noor Precious Metals Securities Fund**

It is obligatory to purify dividends from prohibited income (e.g. interest earnings, income generated by other impermissible activities, etc).

The Fund may invest only in companies that satisfy the Sharia criteria stated in the Prospectus. Where the Fund invests in a company which satisfies the Sharia Investment Guidelines set out in the Prospectus but which still derives a portion of its revenue from prohibited activities, then the Fund must cleanse, where appropriate, all dividend and income receipts from such a company by donating a certain portion of such dividend receipts to charity.

In order to purify the income received from prohibited activities, an amount equivalent to 5% of all cash dividends received within the Fund will be donated to a charity. The Administrator shall provide a schedule on a semi-annual basis showing the amount to be paid to charities in respect of the prohibited income received from investments of the Fund.

During the course of each financial period, when the Fund receives any dividend, 5% of the dividend will be deducted from the Net Asset Value of the sub-fund and accrued separately.

The Directors shall determine which charities shall benefit from donations (with no direct or indirect benefit accruing to the Sharia Advisor, Sharia Supervisory Committee of the Sharia Advisor, the ICAV, its Funds or any of its investors) and the Fund shall make any donations to such charitable organisations within a reasonable time after such determination in good faith. Such donations will be deducted directly from the assets of the Fund by the Fund. Donations shall be made to charitable institutions as the Directors shall determine from time to time in consultation with the Investment Manager and Sharia Advisor.

It is not permitted to conclude futures or options contracts or other forms of derivative instruments on the Fund's assets without the explicit approval from the Sharia Advisor.

It is not permissible to undertake trading in the shares of a corporation when the assets of such corporations are exclusively comprised of cash.

The Fund may acquire foreign currency by way of spot currency contracts for the purpose of purchasing listed equity and equity-related transferable securities as well as non-listed securities, for the day-to-day operations of the Fund (subject always to the further restrictions as set out herein i.e. not for the purposes of hedging or entering into short positions) and may sell such foreign currencies by way of spot currency contracts where such foreign currencies are the proceeds of sale of listed or non-listed transferable equity and equity-related transferable securities.

**Sharia Investment Guidelines - DWS Noor Precious Metals Securities Fund (continued)**

**Purification of Income - DWS Noor Precious Metals Securities Fund (continued)**

The Fund may purchase units or shares of one or several UCITS provided they are not prohibited under the restrictions specified under investment restrictions as set out in the section of the Prospectus entitled Investment Restrictions, provided that such UCITS shall comply with the Sharia Investment Guidelines.

Subject to the UCITS Regulations and the requirements of the Central Bank, the Sharia Investment Guidelines as set out in the Fund's Supplement shall continue to be complied with. The Sharia Investment Guidelines may be modified from time to time by the Sharia Advisor as deemed appropriate.

#### Market & Fund Performance Review

The MSCI ACWI Index had a turbulent first half of 2025. Despite the volatility, the index return on a year-to-date basis reached 9.73% (EOD) at the end of June. The dominant theme moving global equities was the new trade regime the U.S. administration announced after the inauguration in January. The back and forth between imposing tariffs and shortly after postponing them were the main reason for the elevated volatility. Chinese tech stocks were challenging US AI dominance in January, leading to a particular strong performance of the MSCI China in Q1. The escalation of the Israel-Iran also dampened the sentiment of investors in June.

Global equities started well into 2025, but sentiment changed as speculations about fewer rate cuts emerged. With the Trump inauguration sentiment changed to the positive side but was short-lived as the Chinese “DeepSeek” AI start-up challenged the U.S. dominance. Tech and particularly the Semiconductor space in the U.S. were hit hard by the dual risks of tariff uncertainty and the costs of the AI buildout.

---

The first countries hit by new tariffs of 25% in February were American neighbours and major trading partners Mexico and Canada. As both countries fought back, the U.S. delayed the final regulation to have more time for negotiations. The Q2 began with the fifth-largest two-day slump (of over 10%) in the S&P 500 since World War II, triggered for that was Trump's tariff package consisting of a base rate of 10%, to which individual rates in the mid-double digits (EU 20%, Japan 24%, China more than 35%) were added. At the peak of tariff escalation, the MSCI ACWI index was down roughly 11.5% on a year-to-date basis. The market storm, fears of recession in the U.S. and Moody's downgrade of America's credit rating forced a 90-day moratorium on individual tariffs for many countries, followed by a moratorium with China. Global markets rebounded with the MSC ACWI index recovering from its year-to-date low in April by 24% until the end of June. Even the war with Iran pushed up oil prices and dampened the sentiment of investors only briefly. Throughout the quarter, generally stable economic figures so far around the globe were supportive for markets.

Politics outside the U.S. also moved markets. In February, European governments and in particular the newly constituted German government announced historical public investment packages in infrastructure and military capabilities. The trillion-euro fiscal package announced at the beginning of March and the end of the German debt brake has sent defence stocks soaring. European stocks outperformed their U.S. peers in Q1 significantly. Also, central bank policy in Europe was supportive. The European Central Bank reduced the rates by 1% points over the course of the first half of 2025. The US counterpart Fed on the other side held their leading interest rate constant while pointing at potential inflation risk associated with the new tariff regime.

Through the factor lens, the first half of 2025 showed a discontinuation of the trends seen in 2024. Whereas in the previous year the AI theme was driving markets via Momentum and Growth stocks, there was no stable factor trend during the reporting period. With China challenging the U.S. AI dominance, Momentum factor reversed sharply in February alleviating its heavy concentration in Growth, Mega-Caps and Tech. Instead, Low Volatility and Value were the dominant factors until April when tariff tensions peaked. Value was primarily driven by European infrastructure and defence stocks. As stock markets rebounded in the second half of the reporting period, Growth and Momentum rebounded again based on an improved outlook regarding the global economy, strong Q1 results of U.S. tech companies and expected rate cuts by the Fed.

DWS Qi Global AC Equity Fund gained 10.54% (NAV base) in the first half of 2025. In relative terms, the portfolio outperformed its benchmark by 0.81%.

The overall active return was mainly driven by the portfolio's exposure to Growth and fundamental Analyst Sentiment resulting from the applied multi-factor stock screening model. The positive impact was particularly strong in Q2. Additionally, the portfolio exposure to Value factors was rewarded in February and March during the strongest Value rebound in the first half of 2025. Unrewarded Quality exposure via Financial Strength detracted active return in H1 2025. The idiosyncratic component was a major performance drag in Q1 due to turbulence created by the announced tariffs. The impact, however, reversed and was supportive during Q2.

From the regional perspective, two out of three DM regions delivered positive relative attribution effects dominated by the strong stock selection in North America. The EM region delivered slightly negative attribution effects driven by the challenging stock selection in South Korea.

In the sector breakdown, Industrials and Financials sectors led the market performance with +17.88% resp. +17.32%, followed by Utilities. Consumer Discretionary and Health Care lagged the market with 0.65% resp. 1.01%. The stock selection was the most successful in Health Care, Utilities, Financials and Consumer Discretionary while the selection attribution effects were negative in Industrials, Materials and IT.

During the first half, Gold, Platinum, Silver, and Palladium each had positive returns of 27.74%, 25.68%, 23.35%, and 10.30%, respectively. Gold and precious metals equities, as measured by the S&P BMI Gold and Precious Metals Index (non-Sharia compliant), gained 58.44% during the period. Gold ETFs had net inflows of 5.55mm oz, or about 6.6% of total known gold ETFs.

Precious Metals performance was positive across all segments, including Palladium, Platinum, Silver, and Gold on a mix of higher potential demand and tariff implications. U.S. rhetoric regarding tariffs for Canadian and Mexican imports raised concerns over potential inflationary impacts. Stronger U.S. economic data and slower inflation progress may also lead to slower than expected rate cuts for the Fed. Key focal points include central bank policy, retail buying, geopolitical events, structural government debt and deficit concerns, and tariffs, which have collectively driven a scramble for precious metals in physical markets. A more-hawkish Fed posture and stronger U.S. dollar could pose challenges for gold to break out meaningfully to new highs in the short run. Platinum and Palladium remained sensitive to changes in industrial/manufacturing activity.

We hold a positive view on gold on a long-term paradigm shift, the drivers are central bank reserve accumulation, asset flows, and a flight-to-safety bid during risk-off events. However, gold prices have moved in sync with other risky assets, but gold is also a liquid asset for generating cash at times of distress. The physical gold premium should recede with gold bullion being excluded from tariffs. However, favoritism for physical gold should keep physical gold in premium vs. future contracts. Top-extensions and positioning show more risk to a pullback, but we remain bullish medium term and see pullbacks getting bought by investors.

Silver and Palladium/Platinum are more exposed to weaker growth and 25% tariffs on autos. Industrial demand of Silver from areas such as solar panels, wind power generators, etc. may decline due to slow down in global GDP. On the flip side, should countries such as China apply fiscal measures to counter tariff impact, silver demand may benefit from additional infrastructure spending programs.

Contributors to the performance of the fund: The following Gold and PGM equities contributed positively to performance: Agnico Eagle Mines Ltd. (5.14%), Newmont Corp. (5.03%), and Gold Fields Ltd. (3.91%).

Detractors to the performance of the fund: The following Gold and PGM equities lagged in performance: MAG Silver Corp. (0.04%), Westgold Resources Ltd. (0.09%), and Alkane Resources Ltd. (0.13%).

Our risk-on positioning was beneficial, as especially in the second quarter, many geopolitical risks started to price out, and the constant tariff threats out of the US were taken more and more reluctantly by risky asset buyers. While total return was helped by the rates move during Q1, Q2 was more rates neutral with sideways moving short-term rates. Credit curves got steeper over the period, but with our short duration funds here, we had only been involved in the shorter end of the curve. Lower-rated names underperformed the most, particularly in the automotive and banking sectors. We kept our overall duration positioning slightly long against the benchmark and had a credit risk overweight positioning against the benchmark throughout the period.

### **NOTES TO THE CONDENSED FINANCIAL STATEMENTS**

**For the financial period ended 30 June 2025**

---

#### **1. Statement of compliance**

These unaudited condensed financial statements have been prepared in accordance with IAS 34, "Interim Financial Reporting". These condensed financial statements do not contain all of the information and disclosures required in annual audited financial statements and should be read in conjunction with the ICAV's audited financial statements for the financial year ended 31 December 2024, which have been prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union (the "EU"), the Acts and the Central Bank UCITS Regulations.

#### **2. Summary of material accounting policies**

##### **a) Basis of preparation**

The condensed financial statements have been prepared on a going concern basis and under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities at fair value through profit or loss, with the exception of DWS Noor Precious Metals Securities Fund which has been prepared on a non going concern basis.

##### **b) Standards and interpretations applicable to future reporting periods**

There are no standards, interpretations or amendments to existing standards that are not yet effective that would be expected to have a material impact on the ICAV.

##### **c) Estimates policy**

The preparation of these condensed financial statements requires the Directors of the ICAV to make judgements, estimates and assumptions that affect the application of policies and the reported amounts of assets and liabilities, contingent assets or liabilities, income and expenses. The estimates and associated assumptions are based on various factors that are believed to be reasonable under the circumstances, the results of which forms the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources.

Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

There were no contingent assets or liabilities during the period.

#### **3. Taxation**

Under current law and practice, the ICAV qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains.

However, Irish tax may arise on the happening of a 'chargeable event'. A chargeable event includes any distribution payments to shareholders, any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight year period beginning with the acquisition of such shares.

No Irish tax will arise on the ICAV in respect of chargeable events in respect of:

- a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the ICAV, or the ICAV has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations;
- certain exempted Irish tax resident shareholders who have provided the ICAV with the necessary signed statutory declarations; and
- certain transfer of shares between spouses or civil partners.

#### 6. Financial instruments and associated risks

The ICAV's financial risk management objectives and policies are consistent with those disclosed in the ICAV's audited financial statements as at 31 December 2024.

#### 7. Fair Value Hierarchy

The Funds are required to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1 - Quoted market price in an active market for an identical instrument.
- Level 2 - Valuation techniques based on observable inputs. This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.
- Level 3 - Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs could have a significant impact on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability. The determination of what constitutes 'observable' requires significant judgement by the Investment Manager. The Investment Manager considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary and provided by independent sources that are actively involved in the relevant market.
