

Key investor information for investors in Switzerland

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

DB Balanced SAA (USD)

Share class: USD WAMC, ISIN: LU2132882700, Security code: DWS27E, Currency: USD

a sub-fund of DWS Strategic. The management company is DWS Investment S.A., a member of the DWS Group.

Objectives and investment policy

The fund is actively managed. The fund is not managed in reference to a benchmark. The investment objective of the Fund is to achieve a mid to long-term capital growth. In order to achieve the investment objective, the Fund will seek to gain exposure to three primary asset class portfolios diversified among and within themselves, being a Fixed Income Portfolio, an Equity Portfolio and an Alternatives Portfolio. The Fund's investments will be allocated to the portfolios in the proportions determined at the discretion of the Investment Manager, DWS Investment GmbH, on the basis of advice received from the Investment Advisor, the wealth management division of Deutsche Bank AG. In order to advise the Investment Manager, the Investment Advisor uses a strategic asset allocation approach, taking into account expected return, volatility and correlation in each portfolio. The Investment Advisor aims to suggest an allocation to provide the opportunity for a mid to long-term capital growth. The expected range of allocations for a

"balanced" portfolio is a) Fixed Income Portfolio: up to 75%; b) Equity Portfolio: 25-60%; and c) Alternatives Portfolio: 0-15%. The Fund will also aim to weight each of the Portfolios towards exposure to USD denominated assets, such that the Fund has a US focus. Exposure to the Portfolios will principally be obtained through investment in exchange traded fund or funds (each an ETF) or other collective investment schemes or, in the case of single commodity exposures, through debt securities linked to the performance of such individual commodities, such as exchange traded notes or certificates. As an alternative to investing in an ETF, the Investment Manager may take exposure to a Financial Index through the use of Financial Derivative Instruments. The currency of the fund is USD. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 5 because its share price fluctuates comparatively strongly and the likelihood of both losses and gains is therefore relatively high. The following risks could be of particular significance for the fund: The fund invests substantially in other funds. When investments are made in other funds, it must be taken into consideration that multiple target funds may pursue the same or mutually opposing investment strategies. This may result in

lower diversification effects. The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases. The fund invests in emerging markets. Investing in assets from the emerging markets generally entails a greater risk (potentially including considerable legal, economic and political risks) than investing in assets from the markets of established countries. The fund invests in bonds, the value of which depends on whether the issuer is able to afford its payments. The deterioration of credit quality (ability and willingness to repay) may have an adverse effect on the value of the bond. The DWS companies and their affiliates may perform several duties for the fund and, for example, function as the distributor and the management company, which may give rise to conflicts of interest. The fund does not provide a capital guarantee and your investment is at your own risk. The value of your investment may rise as well as fall.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest
