

Key Investor Information for Investors in the United Kingdom

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

DWS Invest Global Real Estate Securities

Share class: USD LC, ISIN: LU0507268869, Security code: DWS0Z3, Currency: USD

a sub-fund of DWS Invest. The management company is DWS Investment S.A., a member of the DWS Group.

Objectives and investment policy

The fund is actively managed. The fund is not managed in reference to a benchmark. The objective of the investment policy is to achieve an above-average return. In order to achieve this, the fund invests primarily in the equities of listed companies that own, develop or manage real estate, providing these equities are considered transferable securities. When selecting investments, environmental and social aspects and the principles of good corporate governance (ESG aspects) are taken into consideration

alongside the financial performance. In this context, the selection of individual investments is the responsibility of the fund management. The currency of the fund is USD. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis. The Company may, however, suspend or restrict the redemption if extraordinary circumstances appear to make this necessary, taking into account the interests of the investors.

Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high. The

following risks could be of particular significance for the fund: The fund uses derivatives on underlyings so as to participate in their increases in value or to bet on their losses in value. The increased opportunities associated with this are accompanied by increased risk of loss. Furthermore, derivative transactions may be used to hedge the fund's assets. The use of derivative transactions for hedging purposes may reduce the fund's upside opportunities. The fund invests its assets in selected regions or sectors. This increases the risk that the fund may be negatively influenced by the economic and political conditions in the respective regions or sectors.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.
