DWS Invest Latin American Equities

Share class: LC, ISIN: LU0399356780, Security code: DWS0VL, Currency: EUR

a sub-fund of DWS Invest. The management company is DWS Investment S.A., a member of the DWS Group.

Objectives and investment policy

The fund is actively managed. The fund is managed in reference to a benchmark. The objective of the investment policy is to achieve capital appreciation that exceeds the benchmark (MSCI EM Latin America 10/40 Index (EUR)). In order to achieve this, the fund invests primarily in equities of issuers that have their registered office in Latin America or conduct their principal business activity in Latin America or which, as holding companies, hold primarily interests in companies registered in Latin America. The selection of individual investments is at the discretion of the fund management. The majority of the fund's securities or their issuers are expected to be components of the benchmark. The fund management will use its discretion to invest in securities and sectors that are not included in the benchmark in order to take advantages of specific investment opportunities. The portfolio is not necessarily expected to have a similar weighting to the benchmark. In regard to its benchmark, the sub-fund positioning can deviate significantly (e.g. by a positioning

outside of the benchmark as well as a significant underweighting or overweighting) and the actual degree of freedom is typically relatively high. A deviation generally reflects the fund manager's evaluation of the specific market situation, which may lead to a defensive and closer or a more active and wider positioning compared to the benchmark. Despite the fact that the fund aims to outperform the benchmark, the potential outperformance might be limited depending on the prevailing market environment (e.g. less volatile market environment) and actual positioning versus the benchmark. The currency of the fund is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis. The Company may, however, suspend or restrict the redemption if extraordinary circumstances appear to make this necessary, taking into account the interests of the investors.

Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 7 because its share price may fluctuate very strongly

and the likelihood of both losses and gains may therefore be very high. The following risks could be of particular significance for the fund: The fund invests in financial instruments that are basically sufficiently liquid but which may be illiquid under certain circumstances. This means that regular trade may be temporarily disrupted or impossible. The fund invests in emerging markets. Investing in assets from the emerging markets generally entails a greater risk (potentially including considerable legal, economic, operational and political risks) than investing in assets from the markets of established countries.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.
