Objectives and investment policy

The fund is actively managed. The fund is not managed in reference to a benchmark. The objective of the investment policy is to achieve an above average appreciation of capital. In order to achieve this, the sub-fund invests at least 75% of its net asset value globally in equities of all market capitalizations, stock certificates, participation and dividend right certificates, convertible bonds and equity warrants. Thereof at least 51% are invested in issuers that have at least part of their economic activities in areas that the sub-fund management considers relevant in the context of mitigating climate change and its effects. The reference to climate technologies shall be understood in a broad sense including the value chain of solutions that help to avoid, reduce, or capture carbon emissions. Further, at least 10% of the sub-fund's net assets are invested worldwide in issuers that have at least part of their economic activities in areas that the sub-fund management

considers relevant in the context of adapting to climate change and its effects. This refers to an approach that attempts to deal with the climate related changes that have already occurred or are still expected, and in particular, to address the negative consequences or risks for the environment and/or society. To assess the relevance in the context of mitigating or adapting to climate change and its effects, the sub-fund management is selecting issuers using a proprietary quantitative and/or qualitative methodology. Further details of the sub-fund's investment strategy are specified in the Special Section of the Sales Prospectus. The currency of the fund is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis. The Company may, however, suspend or restrict the redemption if extraordinary circumstances appear to make this necessary, taking into account the interests of the investors.

represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high. The following risks could be of particular significance for the fund: The fund invests its assets in selected regions or sectors.
