- 57 / Information pursuant to Regulation (EU) 2015/2365
- 74 / Information pursuant to Regulation (EU) 2019/2088 and pursuant to Regulation (EU) 2020/852

General information

The funds described in this report are sub-funds of a SICAV (Société d'Investissement à Capital Variable) incorporated under Luxembourg law.

Performance

The investment return, or performance, of a mutual fund investment is measured by the change in value of the fund's shares. The net asset values per share (= redemption prices), with the addition of intervening distributions, are used as the basis for calculating the value. Past performance is not a guide to future results. The corresponding benchmarks – if available – are also presented in the report. All financial data in this publication is as of December 31, 2023 (unless otherwise stated).

Sales prospectuses

Fund shares are purchased on the basis of the current sales prospectus, the key investor information document and the articles of incorporation and by-laws of the SICAV, in combination with the latest audited annual report and any semiannual report that is more recent than the latest annual report.

Issue and redemption prices

The current issue and redemption prices and all other information for shareholders may be requested at any time at the registered office of the Management Company and from the paying agents. In addition, the issue and redemption prices are published in every country of distribution through appropriate media (such as the Internet, electronic information systems, newspapers, etc.).

Merger of sub-funds

Following a resolution to that effect adopted by each respective Board of Directors and with the approval of the Luxembourg Supervisory Authority (CSSF), the sub-fund DWS Invest II Euro Bonds Conservative of DWS Invest II, SICAV was merged into the sub-fund DWS Invest ESG Floating Rate Notes of DWS Invest, SICAV effective December 12, 2023:

Merged share class		Receiving share class				
Share class	ISIN	Share class	ISIN	Exchange factor*		
NC	LU2023375111	LC	LU1965927921	0.9860303		

Liquidations of sub-funds

The sub-fund DWS Invest II Global Total Return Fund (in liquidation) was liquidated effective October 26, 2023, following a resolution to that effect adopted by the Board of Directors of the SICAV and the approval of the Luxembourg supervisory authority CSSF. The issue of new shares of the sub-fund was discontinued effective September 15, 2023. Investors could redeem sub-fund shares until September 15, 2023.

Annual report and annual financial statements

Annual report DWS Invest II ESG European Top Dividend

Investment objective and performance in the reporting period

DWS Invest II ESG European Top Dividend invests mainly in the equities of European issuers expected to return above-average dividend yields. Dividend yield is a key criterion in the selection of individual stocks. However, the dividend vields need not necessarily be above the market average. When selecting suitable investments, environmental and social aspects and the principles of good corporate governance (ESG criteria) are taken into consideration. These aspects are an integral component of the investment strategy.*

The sub-fund recorded an appreciation of 8.0% per share (LC share class; BVI method; in euro) in the fiscal year through December 31, 2023.

Investment policy in the reporting period

The international capital markets experienced some turbulence in 2023. Geopolitical crises like the Russia-Ukraine war that has been ongoing since February 24, 2022, the intensifying strategic competition between the USA and China and the conflict in Israel/ Gaza, but also high inflation and slower economic growth initially led to a marked deterioration in market sentiment. To counteract inflation and its dynamics, many central banks raised interest rates noticeably, bringing many years of expansionary monetary policy to an end. Against that backdrop, and in view of globally weakening economic growth, there were mounting fears among market players of a recession taking hold. However, inflation slowed perceptibly in

"BVI method" performance, i.e., excluding the initial sales charge. Past performance is no guide to future results.

As of: December 31, 2023

most countries over the remainder of the fiscal year through the end of December 2023, prompting the majority of central banks to halt their cycle of interest rate hikes.

In addition to the U.S. exchanges that - boosted in particular by technology stocks in the face of growing interest in the topic of artificial intelligence - recorded strong price gains as measured by the S&P 500, the equity markets in the European industrial countries also posted appreciable price increases in the 2023 calendar year. For example, the German equity market, as measured by the DAX index, also recorded substantial gains, buoyed by factors such as the easing of the gas crisis since the first quarter of 2023 and an economic slowdown that turned out to be less severe than feared. In addition, the easing of inflation in the euro area as the year progressed gave rise to market expectations of an end to the rise in interest rates as well as

interest rate cuts in the following year. Against this backdrop, the European equities contained in the portfolio also recorded a significant price increase overall in the reporting period.

Information on the environmental and/or social characteristics

This product reported in accordance with Article 8 (1) of Regulation (EU) 2019/2088 on sustainabilityrelated disclosures in the financial services sector ("SFDR").

Presentation and content requirements for periodic reports for financial products as referred to in Article 8 (1) of Regulation (EU) 2019/2088 (SFDR) and in Article 6 of Regulation (EU) 2020/852 (Taxonomy Regulation) are available at the back of the report.

Further details are set out in the current sales prospectus.

Highest market risk exposure	%	106.046	
J			
	%		

The values-at-risk were calculated for the period from January 1, 2023, through December 31, 2023 using historical simulation with a 99% confidence level, a 10-day holding period and an effective historical observation period of one year. The risk in a reference portfolio that does not contain derivatives is used as the measurement benchmark. Market risk is the risk to the fund's assets arising from an unfavorable change in market prices. The Company determines the potential market risk by means of the **relative value-at-risk approach** as defined in CSSF circular 11/512.

In the reporting period, the average leverage effect from the use of derivatives was 0.2, whereby the total of the nominal amounts of the derivatives in relation to the fund's assets was used for the calculation (sum-of-notional approach).

The gross exposure generated via derivatives pursuant to point 40 a) of the "Guidelines on ETFs and other UCITS issues" of the European Securities and Markets Authority (ESMA) totaled EUR 0.00 as of the reporting date.

Notes on valuation

Under the responsibility of the Board of Directors of the SICAV, the Management Company determines the net asset values per share and performs the valuation of the assets of the fund. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus.

If no trading prices are available, prices are determined with the aid of valuation models (derived market values) which are agreed between State Street Bank International GmbH, Luxembourg Branch, as external price service provider and the Management Company and which are based as far as possible on market parameters. This procedure is subject to an ongoing monitoring process. The plausibility of price information from third parties is checked through other pricing sources, model calculations or other suitable procedure.

Assets reported in this report are not valued at derived market values.

BVI total expense ratio (TER)

The total expense ratio for the share classes was:

Class CHF LDH (P) 1.64% p.a.,	Class FC 0.86% p.a.,
Class FD 0.86% p.a.,	Class LC 1.61% p.a.,
Class LD 1.61% p.a.,	Class LDH (P) 1.63% p.a.,
Class NC 2.31% p.a.,	Class ND 2.31% p.a.,
Class TFC 0.87% p.a.,	Class TFD 0.86% p.a.,
Class XC 0.40% p.a.,	Class XD 0.40% p.a.

The TER expresses total expenses and fees (excluding transaction costs) as a percentage of a fund's average net assets in relation to the respective share class for a given fiscal year.

As well, the additional income from securities lending resulted in a performance-based fee of $% \left[{{\left[{{n_{\rm{s}}} \right]}_{\rm{s}}} \right]_{\rm{s}}} \right]$

Class CHF LDH (P) <0.001% p.a.,	Class FC <0.001% p.a.,
Class FD <0.001% p.a.,	Class LC <0.001% p.a.,
Class LD <0.001% p.a.,	Class LDH (P) <0.001% p.a.,
Class NC <0.001% p.a.,	Class ND <0.001% p.a.,
Class TFC <0.001% p.a.,	Class TFD <0.001% p.a.,
Class XC <0.001% p.a.,	Class XD <0.001% p.a.

of the average net asset value of the respective share class.

Transaction costs

The transaction costs paid in the reporting period amounted to EUR 380 536.38.

The transaction costs include all costs that were reported or settled separately for the account of the fund in the reporting period and are directly connected to the purchase or sale of assets. Any financial transaction taxes which may have been paid are included in the calculation.

Transactions processed for the account of the fund's assets via closely related companies (based on major holdings of the Deutsche Bank Group)

The share of transactions conducted in the reporting period for the account of the fund's assets via brokers that are closely related companies and persons (share of 5% and above) amounted to 0.00% of all transactions. The total volume was EUR 0.00.

Annual report DWS Invest II ESG US Top Dividend

Investment objective and performance in the reporting period

The objective of the investment policy of DWS Invest II ESG US Top Dividend is to achieve capital appreciation. To meet this objective, the sub-fund invests mainly in equities of issuers from the United States expected to return above-average dividend yields. Dividend yields, as well as their sustainability, amount and growth, are major criteria in the selection of stocks. The amount of dividend vield is a key criterion. However, dividend yields need not exclusively be greater than the market average. When selecting suitable investments, environmental and social aspects and the principles of good corporate governance (ESG criteria) are taken into consideration. These aspects are an integral component of the investment strategy.*

Against this backdrop, the subfund posted an appreciation of 3.8% per share (LC share class; BVI method; in euro) in the fiscal year from the beginning of January through the end of December 2023.

Investment policy in the reporting period

The international capital markets experienced some turbulence in 2023. Geopolitical crises like the Russia-Ukraine war that has been ongoing since February 24, 2022, the intensifying strategic competition between the USA and China and the conflict in Israel/ Gaza, but also high inflation and slower economic growth initially led to a marked deterioration in market sentiment. To counteract

"BVI method" performance, i.e., excluding the initial sales charge. Past performance is no guide to future results.

As of: December 31, 2023

inflation and its dynamics, many central banks raised interest rates noticeably, bringing many years of expansionary monetary policy to an end. Against that backdrop, and in view of globally weakening economic growth, there were mounting fears among market players of a recession taking hold. However, inflation slowed perceptibly in most countries over the remainder of the fiscal year through the end of December 2023, prompting the majority of central banks to halt their cycle of interest rate hikes. The equity markets of the industrial countries posted appreciable price gains in the 2023 calendar year. For example, the U.S. exchanges (as measured by the S&P 500) recorded strong price gains overall, boosted in particular by technology stocks, which benefited from growing interest in the topic of artificial intelligence.

The sub-fund's investment focus was on high-dividend stocks in the

health care and financial sectors, among others.

Information on the environmental and/or social characteristics

This product reported in accordance with Article 8 (1) of Regulation (EU) 2019/2088 on sustainabilityrelated disclosures in the financial services sector ("SFDR").

Presentation and content requirements for periodic reports for financial products as referred to in Article 8 (1) of Regulation (EU) 2019/2088 (SFDR) and in Article 6 of Regulation (EU) 2020/852 (Taxonomy Regulation) are available at the back of the report.

Further details are set out in the current sales prospectus.

The format used for complete dates in security names in the investment portfolio is "day month year".

Composition of the reference portfolio (according to CSSF cir	cular 11/512)		
MSCI USA High Dividend Yield Gross Index in EUR			
Market risk exposure (value-at-risk) (according to CSSF circula	ar 11/512)		
Lowest market risk exposure	%	80.039	
Highest market risk exposure	%	96.419	
Average market risk exposure	%	88.653	

The values-at-risk were calculated for the period from January 1, 2023, through December 31, 2023 using historical simulation with a 99% confidence level, a 10-day holding period and an effective historical observation period of one year. The risk in a reference portfolio that does not contain derivatives is used as the measurement benchmark. Market risk is the risk to the fund's assets arising from an unfavorable change in market prices. The Company determines the potential market risk by means of the **relative value-at-risk approach** as defined in CSSF circular 11/512.

In the reporting period, the average leverage effect from the use of derivatives was 0.0, whereby the total of the nominal amounts of the derivatives in relation to the fund's assets was used for the calculation (sum-of-notional approach).

The gross exposure generated via derivatives pursuant to point 40 a) of the "Guidelines on ETFs and other UCITS issues" of the European Securities and Markets Authority (ESMA) totaled EUR 0.00 as of the reporting date.

Notes on valuation

Under the responsibility of the Board of Directors of the SICAV, the Management Company determines the net asset values per share and performs the valuation of the assets of the fund. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus.

If no trading prices are available, prices are determined with the aid of valuation models (derived market values) which are agreed between State Street Bank International GmbH, Luxembourg Branch, as external price service provider and the Management Company and which are based as far as possible on market parameters. This procedure is subject to an ongoing monitoring process. The plausibility of price information from third parties is checked through other pricing sources, model calculations or other suitable procedure.

Assets reported in this report are not valued at derived market values.

BVI total expense ratio (TER)

The total expense ratio for the share classes was:

Class FC 0.85% p.a.,	Class FD 0.85% p.a.,
Class LC 1.60% p.a.,	Class LCH(P) 1.63% p.a.,
Class LD 1.60% p.a.,	Class NC 2.30% p.a.,
Class NCH(P) 2.33% p.a.,	Class TFC 0.85% p.a.,
Class TFD 0.85% p.a.,	Class USD LC 1.60% p.a.

The TER expresses total expenses and fees (excluding transaction costs) as a percentage of a fund's average net assets in relation to the respective share class for a given fiscal year.

Transaction costs

The transaction costs paid in the reporting period amounted to EUR 18 435.02.

The transaction costs include all costs that were reported or settled separately for the account of the fund in the reporting period and are directly connected to the purchase or sale of assets. Any financial transaction taxes which may have been paid are included in the calculation.

Final distribution

The income for the fiscal year is reinvested.

* Additional information is provided in the sales prospectus.

In the case of a final distribution, any remaining net income for the fiscal year is reinvested.

March 8, 2024

Transactions processed for the account of the fund's assets via closely related companies (based on major holdings of the Deutsche Bank Group)

EUR

The share of transactions conducted in the reporting period for the account of the fund's assets via brokers that are closely related companies and persons (share of 5% and above) amounted to 0.00 % of all transactions. The total volume was EUR 0.00.

3.10

Annual report DWS Invest II Euro Bonds Conservative (in liquidation)

Investment objective and performance in the reporting period

The sub-fund sought to generate the highest possible return in the short term while taking the opportunities and risks of the worldwide capital markets into account. In order to achieve the investment objective, it invested primarily in interest-bearing financial instruments of government and/ or private issuers, money market instruments, time deposits, bank balances and derivatives. At least 70% of its assets were invested in interest-bearing securities of issuers whose ultimate parent company was domiciled in a member country of the Organisation for Economic Co-operation and Development (OECD) or of the G20, in Singapore or in the EU. When selecting investments, environmental and social aspects and the principles of good corporate governance (ESG aspects) were taken into consideration alongside the financial performance.*

In the period from the beginning of January 2023 through December 12, 2023 (merger date), the sub-fund DWS Invest II Euro Bonds Conservative recorded an appreciation of 3.6% per share (NC share class; BVI method; in euro).

Investment policy in the reporting period

The international capital markets experienced some turbulence in 2023. Geopolitical crises like the Russia-Ukraine war that has been ongoing since February 24, 2022, the intensifying strategic competition between the USA and China and the conflict in Israel/ Gaza, but also high inflation and

DWS Invest II Euro Bonds Conservative (in liquidation) Performance of share class (in EUR)

Share class	ISIN	Since the beginning of the shortened fiscal year ¹

¹ Last share price calculation on December 12, 2023

"BVI method" performance, i.e., excluding the initial sales charge. Past nerformance is no quide to future results. As of: December 12, 2023 (date of the last share price calculation)

slower economic growth initially led to a marked deterioration in market sentiment. To counteract inflation and its dynamics, many central banks raised interest rates noticeably, bringing many years of expansionary monetary policy to an end. Against that backdrop, and in view of globally weakening economic growth, there were mounting fears among market players of a recession taking hold. However, throughout the remainder of 2023, inflation slowed perceptibly in most countries. prompting the majority of central banks to halt their cycle of interest rate hikes.

As part of the sub-fund's investment policy, the portfolio management invested predominantly in floating rate notes whose coupons are usually adjusted to the current market interest rate every three months. The sub-fund had also invested in fixed-coupon bonds with short to medium residual maturities. Time deposit investments rounded out the portfolio. Because floating rate notes are issued predominantly by financial institutions, the investment focus was on issues from the financial sector. The portfolio also included corporate bonds. In terms of its regional allocation, the sub-fund was globally positioned, with investments in Europe and the

United States forming the main focus of investment.

Thanks to its portfolio orientation to shorter maturity dates, the interest income was positive due to higher interest rates. The narrowing of the credit spreads of the corporate bonds and financials in the portfolio also made a positive contribution to the sub-fund's investment performance. The reasons for this development were the diminishing inflation momentum and indications of the end of the rises in interest rates, both seen throughout 2023.

Fund liquidation

The sub-fund DWS Invest II Euro Bonds Conservative was merged into the sub-fund DWS Invest ESG Floating Rate Notes of DWS Invest, SICAV, effective December 12, 2023. The exchange factor was 0.9860303. The issue and redemption of shares was discontinued as of December 5, 2023.

Information on the environmental and/or social characteristics

This product reported in accordance with Article 8 (1) of Regulation (EU) 2019/2088 on sustainabilityrelated disclosures in the financial services sector ("SFDR").

Presentation and content requirements for periodic reports for financial products as referred to in Article 8 (1) of Regulation (EU) 2019/2088 (SFDR) and in Article 6 of Regulation (EU) 2020/852 (Taxonomy Regulation) are available at the back of the report.

Further details are set out in the current sales prospectus.

A list of the transactions completed during the reporting period that no longer appear in the investment portfolio is available free of charge from the Management Company upon request.

Net asset value per share and number of shares outstanding	Count/ currency		Net asset value per share in the respective currency
Net asset value per share Class NC	EUR		101.08
Number of shares outstanding Class NC	Count		390 674.840
Presentation of the maximum limit (according to CSSF circu 14.14% of portfolio value	ar 11/512)		
Market risk exposure (value-at-risk) (according to CSSF circu	lar 11/512)		
Lowest market risk exposure	%	0.000	
Highest market risk exposure	%	0.562	
Average market risk exposure	%	0.386	

The values-at-risk were calculated for the period from January 1, 2023, through December 12, 2023 using historical simulation with a 99% confidence level, a 10-day holding period and an effective historical observation period of one year. The risk in a reference portfolio that does not contain derivatives is used as the measurement benchmark. Market risk is the risk to the fund's assets arising from an unfavorable change in market prices. The Company determines the potential market risk by means of the **<u>absolute value-at-risk approach</u>** as defined in CSSF circular 11/512.

In the reporting period, the average leverage effect from the use of derivatives was 0.3, whereby the total of the nominal amounts of the derivatives in relation to the fund's assets was used for the calculation (sum-of-notional approach).

The gross exposure generated via derivatives pursuant to point 40 a) of the "Guidelines on ETFs and other UCITS issues" of the European Securities and Markets Authority (ESMA) totaled EUR 15 551 976.77 as of the reporting date.

Exchange rates (indirect quotes)				
				As of December 12, 2023 (liquidation date)
U.S. dollar	USD	1.077351	= EUR	1
Notes on valuation				

Under the responsibility of the Board of Directors of the SICAV, the Management Company determines the net asset values per share and performs the valuation of the assets of the fund. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus.

If no trading prices are available, prices are determined with the aid of valuation models (derived market values) which are agreed between State Street Bank International GmbH, Luxembourg Branch, as external price service provider and the Management Company and which are based as far as possible on market parameters. This procedure is subject to an ongoing monitoring process. The plausibility of price information from third parties is checked through other pricing sources, model calculations or other suitable procedure.

Assets reported in this report are not valued at derived market values.

Footnotes

* Floating interest rate.

** Does not include positions with a negative balance, if such exist.

Statement of income and expenses (incl. income adjustment)

BVI total expense ratio (TER)

The total expense ratio for the share classes was:

Class NC 0.31%²

The TER expresses total expenses and fees (excluding transaction costs) as a percentage of a fund's average net assets in relation to the respective share class for a given fiscal year.

² Annualization has not been performed for share classes liquidated during the year.

Transaction costs

The transaction costs paid in the reporting period amounted to EUR 0.00.

The transaction costs include all costs that were reported or settled separately for the account of the fund in the reporting period and are directly connected to the purchase or sale of assets. Any financial transaction taxes which may have been paid are included in the calculation.

Transactions processed for the account of the fund's assets via closely related companies (based on major holdings of the Deutsche Bank Group)

The share of transactions conducted in the reporting period for the account of the fund's assets via brokers that are closely related companies and persons (share of 5% and above) amounted to 73.50% of all transactions. The total volume was EUR 609 495 468.50.

Annual report DWS Invest II Global Equity High Conviction Fund

Investment objective and performance in the reporting period

The investment focus of the DWS Invest II Global Equity High Conviction Fund is on equities of domestic and foreign companies that have an above-average growth profile. The investment universe includes equities of companies worldwide whose growth potential is based on one of the following three criteria: companies with activities in strongly growing niche markets, companies with significant business activity in emerging markets, and companies having their registered offices within emerging-market countries. When selecting investments, environmental and social aspects and the principles of good corporate governance (ESG factors) are taken into consideration alongside the financial performance.*

In the reporting period from the beginning of January 2023 through the end of December 2023, the sub-fund recorded an appreciation of 22.0% per share (LC share class; BVI method). Its benchmark, the MSCI AC World, recorded a gain of 18.1% in the same period (both percentages in euro terms).

Investment policy in the reporting period

One investment focus in the past fiscal year was on companies that, in addition to sustainable growth prospects, were characterized by a certain stability regarding their business model and their cash flows. The total number of stocks held in the portfolio was limited to 40. Individual names could thus have a significantly higher weight (as expressed by the words "high

conviction" in the sub-fund name). In contrast to the benchmark, stocks that did not meet the portfolio management's requirements were left out of the portfolio altogether.

The international capital markets experienced some turbulence in 2023. Geopolitical crises like the Russia-Ukraine war that has been ongoing since February 24, 2022, the intensifying strategic competition between the USA and China and the conflict in Israel/ Gaza, but also high inflation and slower economic growth initially led to a marked deterioration in market sentiment. To counteract inflation and its dynamics, many central banks raised interest rates noticeably, bringing many years of expansionary monetary policy to an end. Against that backdrop, and in view of globally weakening economic growth, there were mounting fears among market players of a recession taking hold. However, inflation slowed perceptibly in most countries over the remainder of the fiscal year through the end of December 2023, prompting the

majority of central banks to halt their cycle of interest rate hikes. The equity markets of the industrial countries posted appreciable price gains in the 2023 calendar year. For example, the U.S. exchanges (as measured by the S&P 500) recorded strong price gains overall, boosted in particular by technology stocks, which benefited from growing interest in the topic of artificial intelligence. The German equity market, as measured by the DAX index, also recorded substantial gains, buoyed by factors such as the easing of the gas crisis since the first guarter of 2023 and an economic slowdown that turned out to be less severe than feared. In addition, the easing of inflation in the euro area as the year progressed gave rise to market expectations of an end to the rise in interest rates as well as interest rate cuts in the following year. Price gains were noticeably smaller on the stock exchanges in the emerging markets, with China's equity markets even closing with perceptible losses.

Lowest market risk exposure	%	80.083				
Highest market risk exposure	%	102.232				
Average market risk exposure	%	90.928				

The values-at-risk were calculated for the period from January 1, 2023, through December 31, 2023 using historical simulation with a 99% confidence level, a 10-day holding period and an effective historical observation period of one year. The risk in a reference portfolio that does not contain derivatives is used as the measurement benchmark. Market risk is the risk to the fund's assets arising from an unfavorable change in market prices. The Company determines the potential market risk by means of the **relative value-at-risk approach** as defined in CSSF circular 11/512.

In the reporting period, the average leverage effect from the use of derivatives was 0.3, whereby the total of the nominal amounts of the derivatives in relation to the fund's assets was used for the calculation (sum-of-notional approach).

The gross exposure generated via derivatives pursuant to point 40 a) of the "Guidelines on ETFs and other UCITS issues" of the European Securities and Markets Authority (ESMA) totaled EUR 0.00 as of the reporting date.

Notes on valuation

Under the responsibility of the Board of Directors of the SICAV, the Management Company determines the net asset values per share and performs the valuation of the assets of the fund. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus.

If no trading prices are available, prices are determined with the aid of valuation models (derived market values) which are agreed between State Street Bank International GmbH, Luxembourg Branch, as external price service provider and the Management Company and which are based as far as possible on market parameters. This procedure is subject to an ongoing monitoring process. The plausibility of price information from third parties is checked through other pricing sources, model calculations or other suitable procedure.

Assets reported in this report are not valued at derived market values.

III. Net investment income	EUR	245 433.32
IV. Sale transactions		
Realized gains/losses.	EUR	15 443 034.64
Capital gains/losses	EUR	15 443 034.64
V. Net gain/loss for the fiscal year	EUR	15 688 467.96
BVI total expense ratio (TER)		

The total expense ratio for the share classes was:

Class FC 0.87% p.a.,	Class LC 1.63% p.a.,
Class LD 1.63% p.a.,	Class NC 2.33% p.a.,
Class TFC 0.85% p.a.,	Class TFD 0.88% p.a.

The TER expresses total expenses and fees (excluding transaction costs) as a percentage of a fund's average net assets in relation to the respective share class for a given fiscal year.

As well, the additional income from securities lending resulted in a performance-based fee of

Class FC <0.001% p.a.,	Class LC <0.001% p.a.,
Class LD <0.001% p.a.,	Class NC < 0.001% p.a.,
Class TFC <0.001% p.a.,	Class TFD <0.001% p.a.

of the average net asset value of the respective share class.

Transaction costs

The transaction costs paid in the reporting period amounted to EUR 135 217.47.

The transaction costs include all costs that were reported or settled separately for the account of the fund in the reporting period and are directly connected to the purchase or sale of assets. Any financial transaction taxes which may have been paid are included in the calculation.

Transactions processed for the account of the fund's assets via closely related companies (based on major holdings of the Deutsche Bank Group)

The share of transactions conducted in the reporting period for the account of the fund's assets via brokers that are closely related companies and persons (share of 5% and above) amounted to 0.00% of all transactions. The total volume was EUR 635.06.

Annual report DWS Invest II Global Total Return Fund (in liquidation)

Investment objective and performance in the reporting period

The objective of the investment policy was to generate a positive investment result. To this end, the sub-fund invested worldwide in a variety of assets from the entire range of permissible investment categories and instruments of all asset classes. Depending on the selection of assets, the sub-fund's portfolio composition could vary from a more bond-oriented investment through to an exclusively equity-oriented investment. When selecting investments, environmental and social aspects and the principles of good corporate governance (ESG factors) were taken into consideration alongside the financial performance.*

In the reporting period from the beginning of January 2023 through October 26, 2023 (date of last share price calculation), the sub-fund recorded an appreciation of 3.5% per share (LD share class; BVI method; in euro).

Investment policy in the reporting period

On the equity side, the portfolio management focused its investments on the industrial countries, especially those in North America and Europe. In terms of sector allocation, the equity portfolio was generally broadly diversified. In its bond investments, the subfund was globally positioned in the reporting period. In terms of issuers, the portfolio management invested in corporate bonds and high-yield bonds from the industrial countries and in bonds from the emerging markets, among others.

"BVI method" performance, i.e., excluding the initial sales charge.

Past performance is no guide to future results. As of: October 26, 2023 (date of the last share price calculation)

The international capital markets experienced some turbulence in 2023. Geopolitical crises like the Russia-Ukraine war that has been ongoing since February 24, 2022, the intensifying strategic competition between the USA and China and the conflict in Israel/ Gaza, but also high inflation and slower economic growth initially led to a marked deterioration in market sentiment. To counteract inflation and its dynamics, many central banks raised interest rates noticeably, bringing many years of expansionary monetary policy to an end. Against that backdrop, and in view of globally weakening economic growth, there were mounting fears among market players of a recession taking hold. However, inflation slowed perceptibly in most countries over the remainder of the fiscal year, prompting the majority of central banks to halt their cycle of interest rate hikes.

The equity markets of the industrial countries posted appreciable price gains in the 2023 calendar year. For example, the U.S. exchanges (as measured by the S&P 500) recorded strong price gains overall, boosted in particular by technology stocks, which benefited from growing interest in the topic of artificial intelligence. The German equity market, as measured by the DAX index, also recorded substantial gains, buoyed by factors such as the easing of the gas crisis since the first guarter of 2023 and an economic slowdown that turned out to be less severe than feared. In addition, the easing of inflation in the euro area as the year progressed gave rise to market expectations of an end to the rise in interest rates as well as interest rate cuts in the following year. Price gains were noticeably smaller on the stock exchanges in the emerging markets, with China's equity markets even closing with perceptible losses. On the international bond markets, the previous rise in yields initially continued in the reporting period, driven in particular by the high inflation rates and the central banks' rapid interest rate hikes aimed at curbing inflation. In the fourth quarter of 2023, however, bond yields fell noticeably again with the drop in inflation rates. Overall, the performance of the bond markets was largely positive in 2023. Corporate bonds in particular posted significant returns as their risk premiums narrowed significantly.

Liquidation

The sub-fund DWS Invest II Global Total Return Fund (in liquidation) was liquidated effective October 26, 2023, following a resolution to that effect adopted by the Board of Directors of the SICAV and the approval of the Luxembourg supervisory authority CSSF. The issue of new shares of the sub-fund was discontinued effective September 15, 2023. Investors could redeem sub-fund shares until September 15, 2023.

Information on the environmental and/or social characteristics

This product reported in accordance with Article 8 (1) of Regulation (EU) 2019/2088 on sustainabilityrelated disclosures in the financial services sector ("SFDR").

Presentation and content requirements for periodic reports for financial products as referred to in Article 8 (1) of Regulation (EU) 2019/2088 (SFDR) and in Article 6 of Regulation (EU) 2020/852 (Taxonomy Regulation) are available at the back of the report.

^{*} Further details are set out in the current sales prospectus.

Composition of the reference portfolio (according to CSSF circular 11/512) 25% BBG Global Aggregate Index in EUR, 25% BBG Global Aggregate Index (Euro Hedged), 25% MSCI All Country World Net TR Index, 25% MSCI World Net EUR Hedged Index

Market risk exposure (value-at-risk) (according to CSSF circular 11/512)

Lowest market risk exposure	%	0.018
Highest market risk exposure	%	88.912
Average market risk exposure	%	61.816

The values-at-risk were calculated for the period from January 1, 2023, through October 26, 2023 using historical simulation with a 99% confidence level, a 10-day holding period and an effective historical observation period of one year. The risk in a reference portfolio that does not contain derivatives is used as the measurement benchmark. Market risk is the risk to the fund's assets arising from an unfavorable change in market prices. The Company determines the potential market risk by means of the **relative value-at-risk approach** as defined in CSSF circular 11/512.

In the reporting period, the average leverage effect from the use of derivatives was 0.3, whereby the total of the nominal amounts of the derivatives in relation to the fund's assets was used for the calculation (sum-of-notional approach).

The gross exposure generated via derivatives pursuant to point 40 a) of the "Guidelines on ETFs and other UCITS issues" of the European Securities and Markets Authority (ESMA) totaled EUR 0.00 as of the reporting date.

Notes on valuation									

Against the backdrop of the resolution of the Board of Directors of the SICAV to put the fund into liquidation effective October 26, 2023, the going-concern basis was relinquished and the financial statements were prepared on the basis of liquidation values. Under the responsibility of the Board of Directors of the SICAV, the Management Company determines the net asset values per share and performs the valuation of the assets of the fund.

If no trading prices are available, prices are determined with the aid of valuation models (derived market values) which are agreed between State Street Bank International GmbH, Luxembourg Branch, as external price service provider and the Management Company and which are based as far as possible on market parameters. This procedure is subject to an ongoing monitoring process. The plausibility of price information from third parties is checked through other pricing sources, model calculations or other suitable procedure.

Assets reported in this report are not valued at derived market values.

Statement of income and expenses (incl. income adjustment)

for the period from January 1, 2023, through October 26, 2023 (liquidation date)

BVI total expense ratio (TEP)		

BVI total expense ratio (TER)

The total expense ratio for the share classes was:

Class FD 0.66%², Class LD 1.23%².

Class RD 0.20%2 The TER expresses total expenses and fees (excluding transaction costs) as a percentage of a fund's average net assets in relation to the respective share class for a given fiscal year.

Class ID 0.43%²,

As well, the additional income from securities lending resulted in a performance-based fee of

Class FD 0.005% ² ,	Class ID 0.005% ² ,
Class LD 0.005% ² ,	Class RD 0.005% ²

of the average net asset value of the respective share class.

² Annualization has not been performed for share classes liquidated during the year.

Transaction costs

The transaction costs paid in the reporting period amounted to EUR 23 953.19.

The transaction costs include all costs that were reported or settled separately for the account of the fund in the reporting period and are directly connected to the purchase or sale of assets. Any financial transaction taxes which may have been paid are included in the calculation.

KPMG issued an unqualified audit opinion for the full annual report of this SICAV (Société d'Investissement à Capital Variable). The translation of the report of the réviseur d'entreprises agréé (the independent auditor's opinion) is as follows:

KPMG Audit S.à r.l. 39, Avenue John F. Kennedy 1855 Luxembourg, Luxembourg Tel: +352 22 51 51 1 Fax: +352 22 51 71 E-mail: info@kpmg.lu Internet: www.kpmg.lu

To the shareholders of DWS Invest II SICAV 2, Boulevard Konrad Adenauer 1115 Luxembourg, Luxembourg

REPORT OF THE RÉVISEUR D'ENTREPRISES AGRÉÉ

Report on the audit of the financial statements

Audit opinion

We have audited the financial statements of DWS Invest II SICAV and its respective sub-funds ("the Fund"), which comprise the statement of net assets, including the statement of investments in the securities portfolio and other net assets as of December 31, 2023, the statement of income and expenses and the statement of changes in net assets for the fiscal year ended on that date, as well as the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of DWS Invest II SICAV and its respective sub-funds as of December 31, 2023, and of the results of its operations and changes in its net assets for the fiscal year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of financial statements.

Basis for the audit opinion

We conducted our audit in accordance with the Law of July 23, 2016, on the audit profession ("Law of July 23, 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the Commission de Surveillance du Secteur Financier ("CSSF"). Our responsibilities under the Law of July 23, 2016, and the ISAs as adopted in Luxembourg by the CSSF are further described in the "Responsibilities of the réviseur d'entreprises agréé for the audit of the financial statements" section. We are also independent of the Fund in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants, including International Independence Standards, ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and we have fulfilled our other ethical responsibilities in accordance with these ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information included in the annual report, but does not include the financial statements and our report of the réviseur d'entreprises agréé thereon.

Our audit opinion on the financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibility of the Board of Directors of the Fund

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the ability of the Fund and of its respective sub-funds to continue as going concerns, disclosing, as applicable, matters related to the going concern and using the going concern basis of accounting unless the Board of Directors of the Fund intends either to liquidate the Fund or one of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the réviseur d'entreprises agréé for the audit of the financial statements

The objective of our audit is to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the réviseur d'entreprises agréé that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of July 23, 2016, and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of July 23, 2016, and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures in the notes to the financial statements made by the Board of Directors of the Fund.
- Conclude on the appropriateness of the use by the Board of Directors of the Fund of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Fund or of any its individual sub-funds to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in the report of the réviseur d'entreprises agréé to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of the report of the réviseur d'entreprises agréé. However, future events or conditions may cause the Fund or any of its individual sub-funds to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures in the notes to the financial statements, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Luxembourg, April 17, 2024

KPMG Audit S.à r.l. Cabinet de révision agréé

Pia Schanz

Supplementary information

Retainers, fees and investments of the members of the Board of Directors

Retainers, fees and investments of the members of the Board of Directors for the fiscal year ended December 31, 2022

Upon the approval of the shareholders at the general meeting of the company on April 26, 2023, the annual remuneration of the independent member of the Board of Directors based on the number of sub-funds of the company at the end of the fiscal year was approved. The independent member of the Board of Directors received EUR 10 000 for the fiscal year ended December 31, 2022.

The remuneration of the independent members of the Board of Directors is paid by the Management Company.

To clarify: Non-independent members of the Board of Directors do not receive remuneration for their function as members of the Board of Directors or other contributions in kind from the company or the Management Company.

Retainers, fees and investments of the members of the Board of Directors for the fiscal year ended December 31, 2023

The general meeting of the shareholders of the company, which is to take place on April 24, 2024, will approve the annual remuneration for the independent and the external member of the Board of Directors for the fiscal year ended December 31, 2023. The amount earmarked for the independent member of the Board of Directors is EUR 10 000 and is based on the number of sub-funds at the end of the fiscal year ended December 31, 2023. The amount earmarked for Directors is EUR 5 000 and is based on the number of sub-funds at the end of Directors is EUR 5 000 and is based on the number of sub-funds at the end of Directors is EUR 5 000 and is based on the number of sub-funds at the end of the fiscal year ended December 31, 2023.

The remuneration of the independent and the external members of the Board of Directors is paid by the Management Company.

To clarify: Non-independent members of the Board of Directors do not receive remuneration for their function as members of the Board of Directors or other contributions in kind from the company or the Management Company.

Remuneration disclosure

DWS Investment S.A. (the "Company") is a subsidiary in DWS Group GmbH & Co. KGaA ("DWS KGaA"), and is subject to the regulatory requirements of the Fifth Directive on Undertakings for Collective Investment in Transferable Securities ("UCITS V Directive") and the Alternative Investment Fund Management Directive ("AIFM Directive") as well as the European Securities and Markets Authority's Guidelines on Sound Remuneration Policies ("ESMA Guidelines") with regard to the design of its remuneration system.

Remuneration Policy & Governance

The Company is governed by the Group-wide Compensation Policy that DWS KGaA has adopted for itself and all of its subsidiaries ("DWS Group" or only "Group").

In line with the Group structure, committees have been set up to ensure the appropriateness of the compensation system and compliance with regulatory requirements on compensation and are responsible for reviewing it.

As such the DWS Compensation Committee was tasked by the DWS KGaA Executive Board with developing and designing sustainable compensation principles, making recommendations on overall compensation and ensuring appropriate governance and oversight with regard to compensation and benefits for the Group.

Furthermore, the Remuneration Committee was established to support the Supervisory Board of DWS KGaA in monitoring the appropriate structure of the remuneration systems for all Group employees. This is done by testing the consistency of the remuneration strategy with the business and risk strategy and taking into account the effects of the remuneration system on the group-wide risk, capital and liquidity management.

The internal annual review at DWS Group level concluded the design of the remuneration system to be appropriate and no significant irregularities were recognized.

Compensation structure

Employee compensation consists of fixed and variable compensation.

Fixed compensation remunerates employees for their skills, experience and competencies, commensurate with the requirements, size and scope of their role.

Variable compensation takes into account performance at group, divisional and individual level. Variable compensation generally consists of two elements - the "Franchise Component" and the "Individual Component".

The Franchise Component is determined based upon the performance of three Key Performance Indicators (KPIs) at DWS Group level. For the performance year 2023 these were: Adjusted Cost Income Ratio ("CIR"), Net Flows and ESG metrics.

The individual component of variable compensation takes into account a number of financial and non-financial factors, relativities within the peer group, and retention considerations. Variable compensation can be reduced accordingly or cancelled completely in the event of negative performance contributions or misconduct. In principle, it is only granted and paid out if the granting is affordable for the Group. Guaranteed variable compensation is not normally granted to employees. On an exceptional basis, guaranteed variable compensation can be granted to new hires but only during their first year of employment.

The compensation strategy is designed to achieve an appropriate balance between fixed and variable compensation. This helps to align employee compensation with the interests of customers, investors and shareholders, as well as to industry standards. At the same time, it ensures that fixed compensation represents a sufficiently high proportion of total compensation to allow the Group full flexibility in granting variable compensation.

Determination of variable compensation and appropriate risk-adjustment

The total amount of variable compensation is subject to appropriate risk-adjustment measures which include ex-ante and ex-post risk adjustments. The robust methodology is designed to ensure that the determination of variable compensation reflects Group's risk-adjusted performance as well as the capital and liquidity position.

A number of considerations are used in assessing the performance of the business units. Performance is assessed in the context of financial and non-financial targets based on balanced scorecards. The allocation of variable compensation to the infrastructure areas and in particular to the control functions depends on the overall results of the Group, but not on the results of the business areas they oversee.

Principles for determining variable compensation apply at individual employee level which detail the factors and metrics that must be taken into account when making IVC decisions. These include, for instance, investment performance, client retention, culture considerations, and objective setting and performance assessment based on the "Total Performance" approach. Furthermore, any control function inputs and disciplinary sanctions and their impact on the VC have to be considered as well.

Sustainable Compensation

Sustainability and sustainability risks are an essential part that determine the variable compensation. Therefore, the remuneration policy is fully in line and consistent with sustainability risks. Hence, DWS Group incentivises behaviour that benefits both interest of clients and the long-term performance of the firm. Relevant sustainability factors are reviewed on a regular basis and incorporated in the design of the compensation system.

Compensation for 2023

The DWS Compensation Committee has monitored the affordability of VC for 2023 and determined that the Group's capital and liquidity levels remain above regulatory minimum requirements, and internal risk appetite threshold.

As part of the overall 2023 variable compensation granted in March 2024, the Franchise Component is awarded to eligible employees in line with the assessment of the defined KPIs. The Executive Board recognizing the considerable contribution of employees and determined a target achievement rate of 82.5% for 2023.

Identification of Material Risk Takers

In accordance with the regulatory requirements, the Company has identified Material Risk Takers. The identification process was carried out in accordance with the Group's policies and is based on an assessment of the impact of the following categories of staff on the risk profile of the Company or on a fund it manages: (a) Board Members/Senior Management, (b) Portfolio/Investment managers, (c) Control Functions, (d) Staff heading Administration, Marketing and Human Resources, (e) other individuals (Risk Takers) in a significant position of influence, (f) other employees in the same remuneration bracket as other Risk Takers, whose roles have an impact on the risk profile of the Company or the Group. At least 40% of the VC for Material Risk Takers is deferred. Additionally, at least 50% of both, the upfront and the deferred proportion, are granted in the Group share-based instruments or fund-linked instruments for Key Investment Professionals. All deferred components are subject to a number of performance conditions and forfeiture provisions which ensure an appropriate ex-post risk adjustment. In case the VC is lower than EUR 50,000, the Material Risk Takers receive their entire variable compensation in cash without any deferral.

Aggregate Compensation Information for the Company for 2023¹

Number of employees on an annual average		99	
Total Compensation ²	EUR	15,739,813	
Fixed Pay	EUR	12,528,700	
Variable Compensation	EUR	3,211,113	
Thereof: Carried Interest	EUR	0	
Total Compensation for Senior Management ³	EUR	1,476,953	
Total Compensation for other Material Risk Takers ⁴	EUR	0	
Total Compensation for Control Function employees	EUR	2,077,858	

In cases where portfolio or risk management activities have been delegated by the Company, the compensation data for delegates are not included in the table. Considering various elements of remuneration as defined in the ESMA Guidelines which may include monetary payments or benefits (such as cash, shares, options, pension contributions) or none (directly) monetary benefits (such as fringe benefits or special allowances for car, mobile phone, etc.).

Senior Management refers to the members of the Management Board of the Company, only. Members of the Management Board meet the definition of managers. Apart from the members of Senior Management, no further managers have been identified. Identified risk takers with control functions are shown in the line "Control Function employees"

If the (sub-)fund has carried out securities lending and borrowing, the (sub-)fund pays 33% of the gross revenues generated from securities lending and borrowing as costs/fees to the Management Company and retains 67% of the gross revenues generated from such transactions. Out of the 33%, the Management Company retains 5% for its own coordination and oversight tasks and pays the direct costs (e.g., transaction and collateral management costs) to external service providers. The remaining amount (after de-duction of the Management Company costs and the direct costs) is paid to DWS Investment GmbH for supporting the Management Company in initiating, preparing and implementing securities lending and borrowing.

For simple reverse repurchase agreement transactions (if permitted), i.e., those which are not used to reinvest cash collateral received under securities lending and borrowing or repurchase agreement transactions, the respective (sub-)fund retains 100% of the gross revenues, less the transaction costs that the (sub-)fund pays as direct costs to an external service provider.

The Management Company is a related party to DWS Investment GmbH.

If the (sub-)fund has entered into repurchase agreement transactions, these are currently simple reverse repurchase agreement transactions, and not other (reverse) repurchase agreement transactions. In case other (reverse) repurchase agreement transactions will be used, the sales prospectus will be updated accordingly. The (sub-)fund will then pay up to 33% of the gross revenues generated from (reverse) repurchase agreement transactions as costs/fees to the Management Company and retain at least 67% of the gross revenues generated from such transactions. Out of the maximum of 33%, the Management Company will retain 5% for its own coordination and oversight tasks and will pay the direct costs (e.g., transaction and collateral management costs) to external service providers. The remaining amount (after deduction of the Management Company costs and the direct costs) will be paid to DWS Investment GmbH for supporting the Management Company in initiating, preparing and implementing (reverse) repurchase agreement transactions.

agreement transactions.

6. Currency/Currencies of collateral received Currency/Currencies: 7. Collateral classified by term to maturity (absolute amounts) Less than 1 day 1 day to 1 week _ 1 week to 1 month _ -1 to 3 months _ 3 months to 1 year More than 1 year _ No fixed maturity -8. Income and cost portions (before income adjustment) Income portion of the fund 15754.16 Absolute _ 67.00% In % of gross income _ Cost portion of the fund _ Income portion of the Management Company Absolute 7 877.08 _ 33.00% In % of gross income -Cost portion of the **Management Company** Income portion of third parties Absolute -_ In % of gross income Cost portion of third parties If the (sub-)fund has carried out securities lending and borrowing, the (sub-)fund pays 33% of the gross revenues generated from securities lending and borrowing as costs/fees to the Management Company and retains 67% of the gross revenues generated from such transactions. Out of the 33%, the Management Company retains 5% for its own coordination and oversight tasks and pays the direct costs (e.g., transaction and collateral management costs) to external service providers. The remaining amount (after de-duction of the Management Company costs and the direct costs) is paid to DWS Investment GmbH for supporting the Management Company in initiating, preparing and implementing securities lending and borrowing. For simple reverse repurchase agreement transactions (if permitted), i.e., those which are not used to reinvest cash collateral received under securities lending and borrowing or repurchase agreement transactions, the respective (sub-)fund retains 100% of the gross revenues, less the transaction costs that the (sub-)fund pays as direct costs to an external service provider. The Management Company is a related party to DWS Investment GmbH. If the (sub-)fund has entered into repurchase agreement transactions, these are currently simple reverse repurchase agreement transactions, and not other (reverse) repurchase agreement transactions. In case other (reverse) repurchase agreement transactions will be used, the sales prospectus will be updated accordingly. The (sub-)fund will then pay up to 33% of the gross revenues generated from (reverse) repurchase agreement transactions as costs/fees to the Management Company and retain at least 67% of the gross revenues generated from such transactions. Out of the maximum of 33%, the Management Company will retain 5% for its own coordination and oversight tasks and will pay the direct costs (e.g., transaction and collateral management costs) to external service providers. The remaining amount (after deduction of the Management Company costs and the direct costs) will be paid to DWS Investment GmbH for supporting the Management Company in initiating, preparing and implementing (reverse) repurchase

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

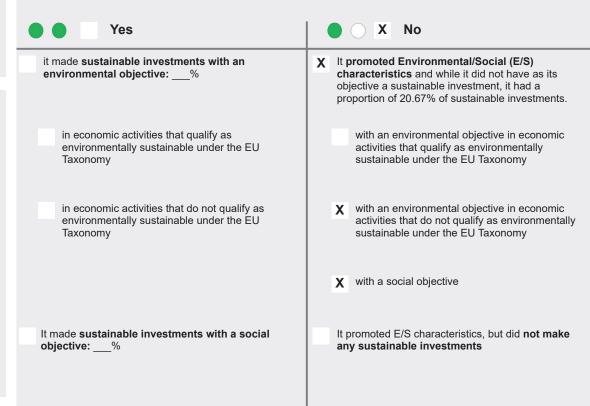

Product name: DWS Invest II ESG European Top Dividend

Did this financial product have a sustainable investment objective?

Legal entity identifier: 5493002FIDT27628I731

ISIN: LU0781237614

Environmental and/or social characteristics

Sustainability indicators measure

how the environmental or social characteristics promoted by the financial product are attained. To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund promoted environmental and social characteristics related to climate, governance, and social norms as well as general ESG quality through the avoidance of

(1) issuers exposed to excessive climate and transition risks,

(2) companies with the worst DWS Norm Assessment (i.e., as regards compliance with international standards of corporate governance, human rights, and labor rights, customer and environmental safety, and business ethics),

(3) companies with very severe unresolved controversies regarding the principles of the United Nations Global Compact (UN Global Compact),

(4) issuers scored among the worst in terms of environmental, social, and governance risks compared to their peer group,

(5) countries flagged as "not free" by Freedom House,

(6) companies whose involvement in controversial sectors exceeds a predefined revenue threshold, and/or

(7) companies involved in controversial weapons.

This sub-fund further promotes a minimum proportion of sustainable investments with a positive contribution to one or several of the United Nations Sustainable Development Goals (UN SDGs).

This sub-fund has not designated a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted.

The attainment of the promoted environmental and social characteristics as well as the sustainable investment was assessed via the application of an in-house DWS ESG assessment methodology as further described in section "What actions have been taken to meet the environmental and/or social characteristics during the reference period?". The methodology applied a variety of assessment approaches that were used as sustainability indicators to assess the attainment of the promoted environmental and social characteristics, which were as follows:

• DWS Climate and Transition Risk Assessment was used as indicator for an issuer's exposure to climate and transition risks.

Performance: No investments in suboptimal assets

• **DWS Norm Assessment** was used as indicator for a company's exposure to norm-related issues towards international standards. Performance: No investments in suboptimal assets

• UN Global Compact-Assessment was used as indicator for whether a company is directly involved in one or more very severe, unresolved controversies related to the principles of the UN Global Compact

Performance: No investments in suboptimal assets

• **DWS ESG Quality Assessment** was used as indicator for comparison of an issuer's environmental, social and governance risks in relation to its peer group. Performance: No investments in suboptimal assets

• **Freedom House Status** was used as indicator for the political-civil freedom of a country. Performance: No investments in suboptimal assets

• Exposure to controversial sectors was used as indicator for a company's involvement in controversial sectors. Performance: 0%

• **DWS exclusions for controversial weapons** was used as indicator for a company's involvement in controversial weapons. Performance: 0%

• DWS-Methodology for determining sustainable investments pursuant to Article 2(17) SFDR (DWS Sustainability Investment Assessment) was used as indicator to measure the proportion of sustainable investments.

Performance: 20.67%

Please see the section entitled "What actions were taken to meet the environmental and/or social characteristics during the reference period?" for a description of the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted, including the exclusion criteria, and the assessment methodology for determining whether and to what extent assets met the defined environmental and/or social characteristics (including the turnover thresholds defined for the exclusions). This section contains further information on the sustainability indicators.

The values from the DWS front office system are used to calculate the sustainability indicators. This means that there may be minor deviations from the other market values that appear in the annual report, which are derived from the fund accounting system.

Attainment of the promoted environmental and social characteristics at portfolio level was measured in the previous year on the basis of the following sustainability indicators:

As of: December 30, 2022

The disclosure of the sustainability indicators has been revised compared with the prior-year report. The assessment methodology is unchanged. Additional information on the currently valid sustainability indicators is provided in the section entitled "What actions were taken to meet the environmental and/or social characteristics during the reference period?"

Information about taking into account the principal adverse impacts on sustainability factors is provided in the section entitled "How did this financial product consider principal adverse impacts on sustainability factors?"

DWS ESG-Assessment Scale

In the following assessment categories, the assets received one of six possible scores, with "A" being the best score and "F" being the worst score.

teria	Involvement in controversial sectors *(1)	Involvement in controversial weapons	Norm Assessment *(6)	ESG Quality Assessment	SDG- Assessment	Climat & Transition Risk Assessment
A	Non-involvement	Confirmed non- involvement	Confirmed no issues	True leader in ESG (>= 87.5 DWS ESG score)	True SDG contributor (>= 87.5 SDG score)	True climate leader (>= 87.5 score)
	Remote involvement	Alleged	Violations of lesser degree	ESG leader (75-87.5 DWS ESG score)	SDG contributor (75- 87.5 SDG score)	Climate solution provider(75-87.5 score)
	0% - 5%	Dual-Purpose *(2)	Violations of lesser degree	ESG upper midfield (50-75 DWS ESG score)	SDG upper midfield (50-75 SDG score)	Low transition risk (50-75 score)
	5% - 10% (coal: 5% - 10%	Owning *(3)/ Owned *(4)	Violation of lesser degree	ESG lower midfield (25-50 DWS ESG score)	SDG lower midfield (25-50 SDG score)	Mod. transition risk (25-50 score)
	10% - 25% (coal: 15% - 25%)	Component Producer *(5)	High severity or re- assessed highest violation *(7)	ESG laggard (12.5- 25 DWS ESG score)	SDG obstructer (12.5-25 SDG score)	High transition risk (12.5-25 score)
	>= 25%	Weapon producer	Highest severity / global compact violation *(8)	True laggard in ESG (0-12.5 DWS ESG score)	Significant SDG obstructer (0-12.5 SDG score)	Excessive transition risk (0-12.5 score)

*(1) Revenue share thresholds as per standard scheme. Sub-Granularity available. Thresholds can be individually set.

*(2) Encompasses e.g.. weapon-carrying systems such as combat aircraft that carry non-controversial weapons as well as controversial ones.

*(3) Owning more than 20% equity.

*(4) Being owned by more than 50% of company involved in grade E or F.

*(5) Single purpose key component.

*(6) Includes ILO controversies as well as corporate governance and product issues.

*(7) In its ongoing assessment, DWS takes into account the violation(s) of international standards – observed via data from ESG data vendors – such as the UN Global Compact, but also possible ESG data vendor errors identified, future expected developments of these violations as well as the willingness of the issuer to engage in dialogue regarding corporate decisions in this regard.

*(8) An F-grade can be considered a reconfirmed violation of the United Nations Global Compact rule framework for corporate behavior.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund partially invested in sustainable investments according to article 2(17) SFDR. Such sustainable investments contributed to at least one of the UN SDGs that related to environmental and/or social objectives, such as the following (non-exhaustive list):

- Goal 1: No poverty
- Goal 2: Zero hunger
- · Goal 3: Good health and well-being
- Goal 4: Quality education
- · Goal 5: Gender equality
- Goal 6: Clean water and sanitation
- · Goal 7: Affordable and clean energy
- · Goal 8: Decent work and economic growth
- · Goal 10: Reduced inequalities
- · Goal 11: Sustainable cities and communities
- · Goal 12: Responsible consumption and production
- Goal 13: Climate action
- · Goal 14: Life below water
- Goal 15: Life on land

The extent of the contribution to individual UN SDGs varied depending on the actual investments in the portfolio.

DWS determined the contribution to the UN SDGs based on its DWS Sustainability Investment Assessment, in which various criteria were used to assess the potential assets with regard to whether an investment could be considered as sustainable. As part of this assessment methodology, it was determined whether (1) an investment made a positive contribution to one or more UN SDGs, (2) the issuer passed the Do Not Significantly Harm ("DNSH") assessment and (3) the company followed good governance practices.

The DWS Sustainability Investment Assessment used data from several data providers, public sources and/or internal assessments based on a defined assessment and classification methodology to determine whether an investment is sustainable. Investments that made a positive contribution to the UN SDGs were assessed based on revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx), depending on the asset. Where a positive contribution was determined, the investment was deemed sustainable if the issuer passed the DNSH assessment and the company followed good governance practices.

The share of sustainable investments as defined in article 2(17) SFDR in the portfolio was calculated in proportion to the economic activities of the issuers that qualified as sustainable. Notwithstanding the preceding, in the case of use-of-proceeds bonds that qualified as sustainable investment, the value of the entire bond was counted towards the share of sustainable investments.

The sub-fund did currently not commit to target a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The DNSH assessment was an integral part of the DWS Sustainability Investment Assessment and evaluated whether an issuer with a contribution to a UN SDG caused significant harm to any of these objectives. In case that a significant harm was identified, the issuer failed the DNSH assessment and the investment could not be considered sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the DWS Sustainability Investment Assessment systematically integrated the mandatory principal adverse indicators on sustainability factors (dependent on relevance) from Table 1 and relevant indicators from Tables 2 and 3 of Annex I of the Commission Delegated Regulation (EU) 2022/1288 supplementing the Sustainable Finance Disclosure Regulation (SFDR). Taking into account these adverse impacts, DWS had established quantitative thresholds and/or qualitative values to determine if an issuer significantly harmed any of the environmental or social objectives. These values were set based upon various external and internal factors, such as data availability or market developments and could be adapted going forward. Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

As part of its sustainability investment assessment, DWS further evaluated through its DWS Norm Assessment the alignment of a company with international norms. This included checks in relation to adherence to international norms, for example, the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the principles of the UN Global Compact and the standards of the International Labour Organization. Companies with the worst DWS Norm Assessment score (i.e., a letter score of "F") could not be considered sustainable and were excluded as an investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters. How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following principal adverse impacts on sustainability factors from Annex I of the Commission Delegated Regulation (EU) 2022/1288 supplementing the Sustainable Finance Disclosure Regulation:

- Greenhouse gas (GHG) emissions (no. 1);
- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);

• Violations of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (no. 14).

For sustainable investments, the principal adverse impacts were also considered in the DNSH assessment as described in section "How have the indicators for adverse impacts on sustainability factors been taken into account?".

DWS Invest II ESG European Top Dividend				
Indicators	Description	Performance		
Principal Adverse Impact				
PAII - 01. GHG emissions	Sum of the current value of investments of company i, divided by the investee company's enterprise value and multiplied by company's cope 1+2+3 GHG emissions.	166735.54 tCO2e		
PAII - 02. Carbon Footprint - EUR	The carbon footprint is expressed as tonnes of CO2 emissions per million EUR invested. The CO2 emissions of an issuer are normalised by its enterprise value including cash (EVIC).	475.36 tCO2e / million EUR		
PAII - 03. Carbon Intensity	Weighted average carbon intensity scope 1+2+3	834.9 tCO2e / million EUR		
PAII - 04. Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector.	27 % of assets		
PAII - 10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises.	0 % of assets		
PAII - 14. Exposure to controversial weapons	Share of investments in investee companies involved in the manufacture or selling of controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).	0 % of assets		

As of: December 29, 2023

The Principal Adverse Impact Indicators (PAIIs) are calculated on the basis of the data in the DWS back office and front office systems, which are primarily based on the data of external ESG data providers. If there is no data on individual PAIIs for individual securities or their issuers, either because no data is available or the PAII is not applicable to the particular issuer or security, these securities or issuers are not included in the calculation of the PAII. With target fund investments, a look-through of the target fund holdings is performed if appropriate data is available. The calculation method for the individual PAI indicators may change in subsequent reporting periods due to evolving market standards, a change in the treatment of securities of certain types of instruments (such as derivatives) or as a result of regulatory clarifications.

Moreover, improved data availability may have an effect on the reported PAIIs in subsequent reporting periods.

What were the top investments of this financial product?

DWS Invest II ESG European Top Dividend

Largest investments	Breakdown by sector according to NACE Codes	in % of average portfolio volume	Breakdown by country	
Deutsche Telekom Reg.	J - Information and communication	3.0 %	Germany

for the period from January 01, 2023, through December 29, 2023

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: for the period from January 01, 2023, through December 31, 2023

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments as of the reporting date was 96.59% of portfolio assets.

What was the asset allocation?

This sub-fund invested 96.59% of its net assets in investments that were aligned with the promoted environmental and social characteristics (#1 Aligned with E/S Characteristics). Within this category, 20.67% of the net assets of the sub-funds qualify as sustainable investments (#1A Sustainable).The minimum proportion of sustainable investments with environmental objectives that do not comply with the EU taxonomy was 7.72% and the proportion of socially sustainable investments was 12.95%. The actual share of sustainable investments with an environmental target that did not comply with the EU taxonomy and socially sustainable investments depended on the market situation and the investable investment universe.

3.41% of the net assets of the sub-fund were invested in all eligible assets for which either the DWS ESG assessment methodology was not applied or whose ESG data coverage was incomplete (#2 Other). Within this share, investments of up to 20% of the net assets of the sub-fund were tolerated in assets for which there was incomplete data coverage in terms of the ESG valuation approaches and exclusions described above. This tolerance did not apply to the assessment of good governance practices (using the DWS standards assessment).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

NACE- Code	Breakdown by sector according to NACE Codes	in % of portfolio volume	
A	Agriculture, forestry and fishing	1.4 %	
В	Mining and quarrying	5.0 %

К	Financial and insurance activities	21.1 %	
М	Professional, scientific and technical activities	32.6 %	
NA	Other	7.4 %	
exposure to concept	ompanies ossil fuel sector	27.0 %	

/ 82

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Due to a lack of reliable data the sub-fund did not commit to invest a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Therefore, the promoted minimum percentage of environmentally sustainable investments aligned with the EU Taxonomy was 0% of the sub-fund's net assets. However, it may occur that part of the investments' underlying economic activities were aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

X No

The sub-fund did not take into account the taxonomy-conformity of investments in the fossil gas and/or nuclear energy sectors. Nevertheless, it might have occured that as part of the investment strategy the sub-fund also invested in issuers that were also active in these areas.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

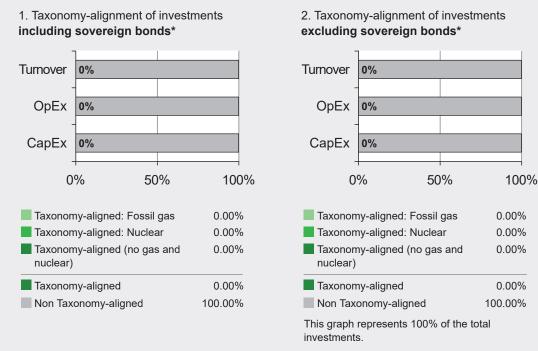

Enabling activities

Directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

Are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance. Taxonomy-aligned activities are expressed as a share of: - turnover reflecting the share of revenue from green activities of investee companies. - capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy. - operational

expenditure (OpEx) reflecting the green operational activities of investee companies. The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomyalignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The sub-fund did not have a minimum share of investments in transitional or enabling activities, as it did not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

The promoted proportion of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) was 0% of the fund's assets in the current as well as previous reference periods. It may, however, have been the case that some sustainable investments were nevertheless aligned with an environmental objective of the Taxonomy Regulation.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852. What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 7.72%.

There was no minimum proportion for sustainable investments with an environmental objective not aligned with the EU Taxonomy in the previous year. The total share of environmentally and socially sustainable investments therefore was 23.08%.

What was the share of socially sustainable investments?

The minimum share of socially sustainable investments was 12.95%. There was no minimum proportion for socially sustainable investments with an environmental objective not aligned with the EU Taxonomy in the previous year. The total share of environmentally and socially sustainable investments therefore was 23.08%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This sub-fund promoted a predominant asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics). In addition, this sub-fund invested 3.41% of the sub-fund's net assets into investments for which either the DWS ESG assessment methodology was not applied or for which ESG data coverage was incomplete (#2 Other). Within this share, investments of up to 20% of the sub-fund's net assets were tolerated in assets for which there was no complete data coverage with respect to the above described ESG assessment approaches and exclusions. This tolerance did not apply to the assessment of good governance practices (by means of the DWS Norm Assessment).

These other investments could have included all asset classes as foreseen in the specific investment policy, including deposits with credit institutions and derivatives.

Other investments could have used by the portfolio management for performance, diversification, liquidity and hedging purposes.

Minimum environmental or social safeguards were not or only partially considered for this subfund within the other investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This sub-fund pursued a strategy based on equities as the main investment strategy. At least 70% of the sub-fund's assets were invested in equities of European issuers that were expected to deliver an above-average dividend yield. When selecting equities, the following criteria were of decisive importance: dividend yield above the market average, sustainability of dividend yield and growth, historical and future earnings growth as well as price/earnings ratio.

Further details regarding the main investment strategy were specified in the Special Section of the Sales Prospectus.

The sub-fund's assets were predominantly allocated into investments that complied with the defined standards in respect to the promoted environmental and social characteristics as described in the following sections. The sub-fund's strategy in relation to the promoted environmental and social characteristics was an integral part of the DWS ESG assessment methodology, which was continuously monitored via the sub-fund's investment guidelines.

DWS ESG assessment methodology

The sub-fund aimed to achieve the promoted environmental and social characteristics by assessing potential assets through an in-house DWS ESG assessment methodology, regardless of their economic prospects for success, and by applying exclusion criteria based on this assessment. The DWS ESG assessment methodology was based on the DWS ESG database, which used data from several ESG data providers, public sources, and/or internal assessments to arrive at derived overall scores. Internal assessments took into account factors such as an issuer's future expected ESG developments, plausibility of data with regard to past or future events, the willingness to engage in dialogue on ESG matters, and ESG-related decisions of a company.

The DWS ESG database derived coded scores within different assessment approaches, as detailed below. Individual assessment approaches were based on a letter scale from "A" to "F." Each issuer received one of six possible scores, with "A" representing the highest score and "F" representing the lowest score on the scale. Within other assessment approaches, the DWS ESG database provided separate assessments, including those related to revenues earned from controversial sectors or the degree of involvement in controversial weapons. If an issuer's score in one assessment approach was deemed insufficient, the sub-fund was prohibited from investing in that issuer or that asset, even if this issuer or asset would generally be eligible according to the other assessment approaches.

The DWS ESG database used, among others, the following assessment approaches to evaluate whether issuers/assets complied with the promoted environmental and social characteristics and whether companies in which investments were made applied good governance practices:

DWS Climate and Transition Risk Assessment

The DWS Climate and Transition Risk Assessment evaluated issuers in the context of climate change and environmental changes, for example, with respect to greenhouse gas reduction and water conservation. Issuers that contributed less to climate change and other negative environmental changes or were less exposed to these risks received better scores. Issuers with an excessive climate and transition risk profile (i.e., a letter score of "F") were excluded as an investment.

DWS Norm Assessment

The DWS Norm Assessment evaluated the behavior of companies, for example, within the framework of the principles of the UN Global Compact, the standards of the International Labour Organization, and behavior within generally accepted international standards and principles. The DWS Norm Assessment examined, for example, human rights violations, violations of workers' rights, child or forced labor, adverse environmental impacts, and business ethics. The assessment considered violations of the aforementioned international standards. These were assessed using data from ESG data providers and/or other available information, such as the expected future developments of these violations as well as the willingness of the company to engage in a dialogue on related business decisions. Companies with the worst DWS Norm Assessment score (i.e., a letter score of "F") were excluded as an investment.

UN Global Compact Assessment

In addition to the DWS Norm Assessment, companies were excluded if they were directly involved in one or more very severe, unresolved controversies related to the principles of the UN Global Compact.

DWS ESG Quality Assessment

The DWS ESG Quality Assessment distinguished between companies and sovereign issuers. For companies, the DWS ESG Quality Assessment allowed for a peer group comparison based on cross-vendor consensus on the overall ESG assessment (best-in-class approach), for example, concerning the handling of environmental changes, product safety, employee management, or corporate ethics. The peer group for companies was made up from the same industry sector. Companies that scored higher in this comparison received a better score, while companies that scored lower in the comparison received a worse score. Companies with the lowest score relative to their peer group (i.e., a letter score of "F") were excluded as an investment.

For sovereign issuers, the DWS ESG Quality Assessment assessed a country based on numerous ESG criteria. Indicators for environmental aspects were, for example, handling of climate change, natural resources, and vulnerability to disasters; indicators for social aspects included the attitude to child labor, equality, and prevailing social conditions; and indicators for good governance were, for example, the political system, the existence of institutions, and the rule of law. In addition, the DWS ESG Quality Assessment explicitly considered the civil and democratic liberties of a country. Sovereign issuers with the lowest score in the peer group comparison (separate groups for developed countries and emerging markets) (i.e., a letter score of "F") were excluded as an investment.

Freedom House status

Freedom House is an international non-governmental organization that classifies countries by their degree of political freedom and civil liberties. Based on the Freedom House status, countries that were labeled as "not free" by Freedom House were excluded..

Exposure to controversial sectors

Investments in companies that are involved in certain business areas and business activities in controversial areas ("controversial sectors") were excluded. Companies were excluded from the portfolio as follows, according to their share of total revenues generated in controversial sectors.

Revenue thresholds for exclusion of controversial sectors:

- Manufacturing of products and/or provision of services in the defence industry: at least 5%
- Manufacturing and/or distribution of civil handguns or ammunition: at least 5%
- Manufacturing of tobacco products: at least 5%
- Manufacturing of products in and/or provision of services for the gambling industry: at least 5%
- Manufacturing of adult entertainment: at least 5%
- Manufacturing of palm oil: at least 5%
- Nuclear power generation and/or uranium mining and/or uranium enrichment: at least 5%
- Extraction of crude oil: at least 10%
- Unconventional extraction of crude oil and/or natural gas (including oil sand, oil shale/shale gas,
- Arctic drilling): more than 0%
- Coal mining: at least 1%
- Power generation from coal: at least 10%
- Coal mining and oil extraction: at least 10%
- Power generation from and other use of fossil fuels (excluding natural gas): at least 10%
- Mining and exploration of and services in connection with oil sand and oil shale: at least 10%

The sub-fund excluded companies with coal expansion plans, such as additional coal mining, coal production or coal usage, based on an internal identification methodology.

The aforementioned coal-related exclusions only applied to so-called thermal coal, i.e., coal that is used in power stations for energy production.

DWS Use of Proceeds Bond Assessment

Deviating from the assessment approaches described above, an investment in bonds of excluded issuers was nevertheless permitted if the particular requirements for use-of-proceeds bonds were met. In this case, the bond was first checked for compliance with the ICMA Principles for green bonds, social bonds, or sustainability bonds. In addition, a defined minimum of ESG criteria was checked in relation to the issuer of the bond, and issuers and their bonds that did not meet these criteria were excluded.

DWS Target Fund Assessment

The DWS ESG database assessed target funds in accordance with the DWS Climate and Transition Risk Assessment, DWS Norm Assessment, UN Global Compact Assessment, DWS ESG Quality Assessment, the Freedom House Status, and with respect to investments in companies that were considered to be manufacturers or manufacturers of key components of anti-personnel mines, cluster munitions, chemical and biological weapons (the shareholdings within a group structure were taken into consideration accordingly). The assessment methods for target funds were based on examining the entire target fund portfolio, taking into account the investments within the target fund portfolio. Depending on the respective assessment approach, exclusion criteria (such as tolerance thresholds) that resulted in the exclusion of the target fund were defined. Accordingly, assets were invested within the portfolios of the target funds that were not compliant with the DWS standards for issuers.

DWS exclusions for controversial weapons

Companies were excluded if they are identified as manufacturers or manufacturers of key components of anti-personnel mines, cluster munitions, chemical and biological weapons, nuclear weapons, depleted uranium weapons or uranium munitions. In addition, the shareholdings within a group structure were also taken into consideration for the exclusions. Furthermore, companies that were identified as manufacturers or manufacturers of key components of incendiary bombs containing white phosphorus were excluded.

Non-ESG assessed asset classes

Not every asset of the sub-fund was assessed by the DWS ESG assessment methodology. This applied in particular to the following asset classes:

Derivatives were currently not used to attain the environmental and social characteristics promoted by the sub-fund and were therefore not taken into account for the calculation of the minimum proportion of assets that comply with these characteristics. However, derivatives on individual issuers were only acquired for the sub-fund if the issuers of the underlyings complied with the DWS ESG assessment methodology.

Deposits with credit institutions were not evaluated via the DWS ESG assessment methodology.

DWS methodology for determining sustainable investments was defined in article 2(17) SFDR (DWS Sustainability Investment Assessment)

Further, for the proportion of sustainable investments DWS measured the contribution to one or several UN SDGs via its DWS Sustainability Investment Assessment which evaluates potential investments in relation to different criteria to conclude that an investment can be considered as sustainable.

The applied ESG investment strategy did not pursue a committed minimum reduction of the scope of the investments.

The assessment of the good governance practices of the investee companies was based on the DWS Norm Assessment. Accordingly, the assessed investee companies followed good governance practices.

How did this financial product perform compared to the reference sustainable benchmark?

This sub-fund has not designated a specific reference benchmark to determine its alignment with the environmental and/or social characteristics it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

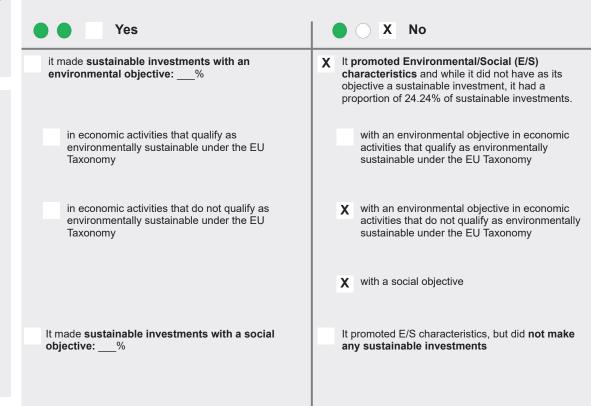

Product name: DWS Invest II ESG US Top Dividend

Legal entity identifier: 549300808BH2BFBPQV18

Did this financial product have a sustainable investment objective?

ISIN: LU0781238778

Environmental and/or social characteristics

Sustainability indicators measure

how the environmental or social characteristics promoted by the financial product are attained. To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund promoted environmental and social characteristics related to climate, governance, and social norms as well as general ESG quality through the avoidance of

(1) issuers exposed to excessive climate and transition risks,

(2) companies with the worst DWS Norm Assessment (i.e., as regards compliance with international standards of corporate governance, human rights, and labor rights, customer and environmental safety, and business ethics),

(3) companies with very severe unresolved controversies regarding the principles of the United Nations Global Compact (UN Global Compact),

(4) issuers scored among the worst in terms of environmental, social, and governance risks compared to their peer group,

(5) countries flagged as "not free" by Freedom House,

(6) companies whose involvement in controversial sectors exceeds a predefined revenue threshold, and/or

(7) companies involved in controversial weapons.

This sub-fund further promotes a minimum proportion of sustainable investments with a positive contribution to one or several of the United Nations Sustainable Development Goals (UN SDGs).

This sub-fund has not designated a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted.

The attainment of the promoted environmental and social characteristics as well as the sustainable investment was assessed via the application of an in-house DWS ESG assessment methodology as further described in section "What actions have been taken to meet the environmental and/or social characteristics during the reference period?". The methodology applied a variety of assessment approaches that were used as sustainability indicators to assess the attainment of the promoted environmental and social characteristics, which were as follows:

• DWS Climate and Transition Risk Assessment was used as indicator for an issuer's exposure to climate and transition risks.

Performance: No investments in suboptimal assets

· DWS Norm Assessment was used as indicator for a company's exposure to norm-related issues towards international standards. Performance: No investments in suboptimal assets

· UN Global Compact-Assessment was used as indicator for whether a company is directly involved in one or more very severe, unresolved controversies related to the principles of the UN Global Compact.

Performance: No investments in suboptimal assets

· DWS ESG Quality Assessment was used as indicator for comparison of an issuer's environmental, social and governance risks in relation to its peer group. Performance: No investments in suboptimal assets

• Freedom House Status was used as indicator for the political-civil freedom of a country. Performance: No investments in suboptimal assets

· Exposure to controversial sectors was used as indicator for a company's involvement in controversial sectors. Performance: 0%

· DWS exclusions for controversial weapons was used as indicator for a company's involvement in controversial weapons. Performance: 0%

• DWS-Methodology for determining sustainable investments pursuant to Article 2(17) SFDR (DWS Sustainability Investment Assessment) was used as indicator to measure the proportion of sustainable investments.

Performance: 24.24%

Attainment of the promoted environmental and social characteristics at portfolio level was measured in the previous year on the basis of the following sustainability indicators:

As of: December 30, 2022

The disclosure of the sustainability indicators has been revised compared with the prior-year report. The assessment methodology is unchanged. Additional information on the currently valid sustainability indicators is provided in the section entitled "What actions were taken to meet the environmental and/or social characteristics during the reference period?"

Information about taking into account the principal adverse impacts on sustainability factors is provided in the section entitled "How did this financial product consider principal adverse impacts on sustainability factors?"

DWS ESG-Assessment Scale

In the following assessment categories, the assets received one of six possible scores, with "A" being the best score and "F" being the worst score.

Criteria	Involvement in controversial sectors *(1)	Involvement in controversial weapons	Norm Assessment *(6)	ESG Quality Assessment	SDG- Assessment	Climat & Transition Risk Assessment
А	Non-involvement	Confirmed non- involvement	Confirmed no issues	True leader in ESG (>= 87.5 DWS ESG score)	True SDG contributor (>= 87.5 SDG score)	True climate leader (>= 87.5 score)
В	Remote involvement	Alleged	Violations of lesser degree	ESG leader (75-87.5 DWS ESG score)	SDG contributor (75- 87.5 SDG score)	Climate solution provider(75-87.5 score)
С	0% - 5%	Dual-Purpose *(2)	Violations of lesser degree	ESG upper midfield (50-75 DWS ESG score)	SDG upper midfield (50-75 SDG score)	Low transition risk (50-75 score)
D	5% - 10% (coal: 5% - 10%	Owning *(3)/ Owned *(4)	Violation of lesser degree	ESG lower midfield (25-50 DWS ESG score)	SDG lower midfield (25-50 SDG score)	Mod. transition risk (25-50 score)
E	10% - 25% (coal: 15% - 25%)	Component Producer *(5)	High severity or re- assessed highest violation *(7)	ESG laggard (12.5- 25 DWS ESG score)	SDG obstructer (12.5-25 SDG score)	High transition risk (12.5-25 score)
F	>= 25%	Weapon producer	Highest severity / global compact violation *(8)	True laggard in ESG (0-12.5 DWS ESG score)	Significant SDG obstructer (0-12.5 SDG score)	Excessive transition risk (0-12.5 score)

*(1) Revenue share thresholds as per standard scheme. Sub-Granularity available. Thresholds can be individually set.

*(2) Encompasses e.g., weapon-carrying systems such as combat aircraft that carry non-controversial weapons as well as controversial ones.

*(3) Owning more than 20% equity.

*(4) Being owned by more than 50% of company involved in grade E or F.

*(5) Single purpose key component.

*(6) Includes ILO controversies as well as corporate governance and product issues.

*(7) In its ongoing assessment, DWS takes into account the violation(s) of international standards – observed via data from ESG data vendors – such as the UN Global Compact, but also possible ESG data vendor errors identified, future expected developments of these violations as well as the willingness of the issuer to engage in dialogue regarding corporate decisions in this regard.

*(8) An F-grade can be considered a reconfirmed violation of the United Nations Global Compact rule framework for corporate behavior.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund partially invested in sustainable investments according to article 2(17) SFDR. Such sustainable investments contributed to at least one of the UN SDGs that related to environmental and/or social objectives, such as the following (non-exhaustive list):

- Goal 1: No poverty
- Goal 2: Zero hunger
- · Goal 3: Good health and well-being
- Goal 4: Quality education
- · Goal 5: Gender equality
- Goal 6: Clean water and sanitation
- Goal 7: Affordable and clean energy
- · Goal 8: Decent work and economic growth
- Goal 10: Reduced inequalities
- · Goal 11: Sustainable cities and communities
- · Goal 12: Responsible consumption and production
- Goal 13: Climate action
- · Goal 14: Life below water
- Goal 15: Life on land

The extent of the contribution to individual UN SDGs varied depending on the actual investments in the portfolio.

DWS determined the contribution to the UN SDGs based on its DWS Sustainability Investment Assessment, in which various criteria were used to assess the potential assets with regard to whether an investment could be considered as sustainable. As part of this assessment methodology, it was determined whether (1) an investment made a positive contribution to one or more UN SDGs, (2) the issuer passed the Do Not Significantly Harm ("DNSH") assessment and (3) the company followed good governance practices.

The DWS Sustainability Investment Assessment used data from several data providers, public sources and/or internal assessments based on a defined assessment and classification methodology to determine whether an investment is sustainable. Investments that mase a positive contribution to the UN SDGs were assessed based on revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx), depending on the asset. Where a positive contribution was determined, the investment was deemed sustainable if the issuer passed the DNSH assessment and the company followed good governance practices.

The share of sustainable investments as defined in article 2(17) SFDR in the portfolio was calculated in proportion to the economic activities of the issuers that qualified as sustainable. Notwithstanding the preceding, in the case of use-of-proceeds bonds that qualified as sustainable investment, the value of the entire bond was counted towards the share of sustainable investments.

The sub-fund did currently not commit to target a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The DNSH assessment was an integral part of the DWS Sustainability Investment Assessment and evaluated whether an issuer with a contribution to a UN SDG caused significant harm to any of these objectives. In case that a significant harm was identified, the issuer failed the DNSH assessment and the investment could not be considered sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the DWS Sustainability Investment Assessment systematically integrated the mandatory principal adverse indicators on sustainability factors (dependent on relevance) from Table 1 and relevant indicators from Tables 2 and 3 of Annex I of the Commission Delegated Regulation (EU) 2022/1288 supplementing the Sustainable Finance Disclosure Regulation (SFDR). Taking into account these adverse impacts, DWS had established quantitative thresholds and/or qualitative values to determine if an issuer significantly harmed any of the environmental or social objectives. These values were set based upon various external and internal factors, such as data availability or market developments and could be adapted going forward.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

As part of its sustainability investment assessment, DWS further evaluated through its DWS Norm Assessment the alignment of a company with international norms. This included checks in relation to adherence to international norms, for example, the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the principles of the UN Global Compact and the standards of the International Labour Organization. Companies with the worst DWS Norm Assessment score (i.e., a letter score of "F") could not be considered sustainable and were excluded as an investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters. How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following principal adverse impacts on sustainability factors from Annex I of the Commission Delegated Regulation (EU) 2022/1288 supplementing the Sustainable Finance Disclosure Regulation:

- Greenhouse gas (GHG) emissions (no. 1);
- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);

• Violations of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (no. 14).

For sustainable investments, the principal adverse impacts were also considered in the DNSH assessment as described in section "How have the indicators for adverse impacts on sustainability factors been taken into account?".

DWS Invest II ESG US Top Dividend

Indicators	Description	Performance		
Principal Adverse Impact				
PAII - 01. GHG emissions	Sum of the current value of investments of company, divided by the investee company's enterprise value and multiplied by company's cope 1+2+3 GHG emissions.	68100.83 tCO2e		
PAII - 02. Carbon Footprint - EUR	The carbon footprint is expressed as tonnes of CO2 emissions per million EUR invested. The CO2 emissions of an issuer are normalised by its enterprise value including cash (EVIC).	166.81 tCO2e / million EUR		
PAII - 03. Carbon Intensity	Weighted average carbon intensity scope 1+2+3.	558.75 tCO2e / million EUR		
PAII - 04. Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector.	11.72 % of assets		
PAII - 10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises.	0 % of assets		
PAII - 14. Exposure to controversial weapons	Share of investments in investee companies involved in the manufacture or selling of controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).	0 % of assets		

As of: December 29, 2023

The Principal Adverse Impact Indicators (PAIIs) are calculated on the basis of the data in the DWS back office and front office systems, which are primarily based on the data of external ESG data providers. If there is no data on individual PAIIs for individual securities or their issuers, either because no data is available or the PAII is not applicable to the particular issuer or security, these securities or issuers are not included in the calculation of the PAII. With target fund investments, a look-through of the target fund holdings is performed if appropriate data is available. The calculation method for the individual PAI indicators may change in subsequent reporting periods due to evolving market standards, a change in the treatment of securities of certain types of instruments (such as derivatives) or as a result of regulatory clarifications.

Moreover, improved data availability may have an effect on the reported PAIIs in subsequent reporting periods.

McDonald's Corp.	I - Accommodation and food service activities	1.7 %	United States

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: for the period from January 01, 2023, through December 31, 2023

Asset allocation describes the share of investments in specific assets. for the period from January 01, 2023, through December 29, 2023

What was the proportion of sustainability-related investments?

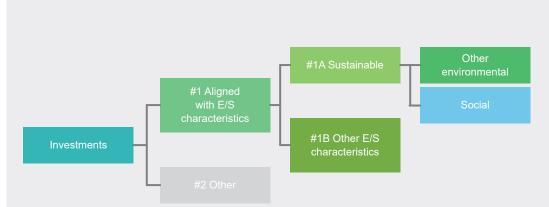

The proportion of sustainability-related investments as of the reporting date was 99.07% of portfolio assets.

Proportion of sustainablility-related investments for the previous year: 99.52%

What was the asset allocation?

This sub-fund invested 99.07% of its net assets in investments that were aligned with the promoted environmental and social characteristics (#1 Aligned with E/S Characteristics). Within this category, 24.24% of the net assets of the sub-funds qualify as sustainable investments (#1A Sustainable). The minimum proportion of sustainable investments with environmental objectives that do not comply with the EU taxonomy was 4.11% and the proportion of socially sustainable investments was 20.13%. The actual share of sustainable investments with an environmental target that did not comply with the EU taxonomy and socially sustainable investments depended on the market situation and the investable investment universe.

0.93% of the net assets of the sub-fund were invested in all eligible assets for which either the DWS ESG assessment methodology was not applied or whose ESG data coverage was incomplete (#2 Other). Within this share, investments of up to 20% of the net assets of the sub-fund were tolerated in assets for which there was incomplete data coverage in terms of the ESG valuation approaches and exclusions described above. This tolerance did not apply to the assessment of good governance practices (using the DWS standards assessment).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

DWS Invest II ESG US Top Dividend

R	Arts, entertainment and recreation	0.6 %		
NA	Other	2.3 %		

As of: December 29, 2023

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Due to a lack of reliable data the sub-fund did not commit to invest a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Therefore, the promoted minimum percentage of environmentally sustainable investments aligned with the EU Taxonomy was 0% of the sub-fund's net assets. However, it may occur that part of the investments' underlying economic activities were aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

X No

The sub-fund did not take into account the taxonomy-conformity of investments in the fossil gas and/or nuclear energy sectors. Nevertheless, it might have occured that as part of the investment strategy the sub-fund also invested in issuers that were also active in these areas.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

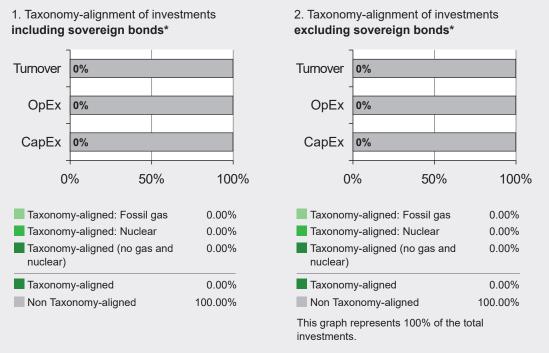

Enabling activities

Directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

Are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance. Taxonomy-aligned activities are expressed as a share of: - turnover reflecting the share of revenue from green activities of investee companies. - capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy. - operational

expenditure (OpEx) reflecting the green operational activities of investee companies. The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomyalignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The sub-fund did not have a minimum share of investments in transitional or enabling activities, as it did not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

The promoted proportion of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) was 0% of the fund's assets in the current as well as previous reference periods. It may, however, have been the case that some sustainable investments were nevertheless aligned with an environmental objective of the Taxonomy Regulation.

0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852. What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy

The minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 4.11%.

There was no minimum proportion for sustainable investments with an environmental objective not aligned with the EU Taxonomy in the previous year. The total share of environmentally and socially sustainable investments therefore was 28.35%.

What was the share of socially sustainable investments?

The minimum share of socially sustainable investments was 20.13%. There was no minimum proportion for socially sustainable investments with an environmental objective not aligned with the EU Taxonomy in the previous year. The total share of environmentally and socially sustainable investments therefore was 28.35%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This sub-fund promoted a predominant asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics). In addition, this sub-fund invested 0.93% of the sub-fund's net assets into investments for which either the DWS ESG assessment methodology was not applied or for which ESG data coverage was incomplete (#2 Other). Within this share, investments of up to 20% of the sub-fund's net assets were tolerated in assets for which there was no complete data coverage with respect to the above described ESG assessment approaches and exclusions. This tolerance did not apply to the assessment of good governance practices (by means of the DWS Norm Assessment).

These other investments could have included all asset classes as foreseen in the specific investment policy, including deposits with credit institutions and derivatives.

Other investments could have used by the portfolio management for performance, diversification, liquidity and hedging purposes.

Minimum environmental or social safeguards were not or only partially considered for this subfund within the other investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This sub-fund pursued a strategy based on equities as its main investment strategy. At least 70% of the sub-fund's assets were invested in equities of United States issuers that were expected to deliver an above-average dividend yield. When selecting equities, the following criteria were of decisive importance: dividend yield above the market average, sustainability of dividend yield and growth, historical and future earnings growth as well as price/earnings ratio.

Further details regarding the main investment strategy were specified in the Special Section of the Sales Prospectus.

The sub-fund's assets were predominantly allocated into investments that complied with the defined standards in respect to the promoted environmental and social characteristics as described in the following sections. The sub-fund's strategy in relation to the promoted environmental and social characteristics was an integral part of the DWS ESG assessment methodology, which was continuously monitored via the sub-fund's investment guidelines.

DWS ESG assessment methodology

The sub-fund aimed to achieve the promoted environmental and social characteristics by assessing potential assets through an in-house DWS ESG assessment methodology, regardless of their economic prospects for success, and by applying exclusion criteria based on this assessment. The DWS ESG assessment methodology was based on the DWS ESG database, which used data from several ESG data providers, public sources, and/or internal assessments to arrive at derived overall scores. Internal assessments took into account factors such as an issuer's future expected ESG developments, plausibility of data with regard to past or future events, the willingness to engage in dialogue on ESG matters, and ESG-related decisions of a company.

The DWS ESG database derived coded scores within different assessment approaches, as detailed below. Individual assessment approaches were based on a letter scale from "A" to "F." Each issuer received one of six possible scores, with "A" representing the highest score and "F" representing the lowest score on the scale. Within other assessment approaches, the DWS ESG database provided separate assessments, including those related to revenues earned from controversial sectors or the degree of involvement in controversial weapons. If an issuer's score in one assessment approach was deemed insufficient, the sub-fund was prohibited from investing in that issuer or that asset, even if this issuer or asset would generally be eligible according to the other assessment approaches.

The DWS ESG database used, among others, the following assessment approaches to evaluate whether issuers/assets complied with the promoted environmental and social characteristics and whether companies in which investments were made applied good governance practices:

DWS Climate and Transition Risk Assessment

The DWS Climate and Transition Risk Assessment evaluated issuers in the context of climate change and environmental changes, for example, with respect to greenhouse gas reduction and water conservation. Issuers that contributed less to climate change and other negative environmental changes or were less exposed to these risks received better scores. Issuers with an excessive climate and transition risk profile (i.e., a letter score of "F") were excluded as an investment.

DWS Norm Assessment

The DWS Norm Assessment evaluated the behavior of companies, for example, within the framework of the principles of the UN Global Compact, the standards of the International Labour Organization, and behavior within generally accepted international standards and principles. The DWS Norm Assessment examined, for example, human rights violations, violations of workers' rights, child or forced labor, adverse environmental impacts, and business ethics. The assessment considered violations of the aforementioned international standards. These were assessed using data from ESG data providers and/or other available information, such as the expected future developments of these violations as well as the willingness of the company to engage in a dialogue on related business decisions. Companies with the worst DWS Norm Assessment score (i.e., a letter score of "F") were excluded as an investment.

UN Global Compact Assessment

In addition to the DWS Norm Assessment, companies were excluded if they were directly involved in one or more very severe, unresolved controversies related to the principles of the UN Global Compact.

DWS ESG Quality Assessment

The DWS ESG Quality Assessment distinguished between companies and sovereign issuers. For companies, the DWS ESG Quality Assessment allowed for a peer group comparison based on cross-vendor consensus on the overall ESG assessment (best-in-class approach), for example, concerning the handling of environmental changes, product safety, employee management, or corporate ethics. The peer group for companies was made up from the same industry sector. Companies that scored higher in this comparison received a better score, while companies that scored lower in the comparison received a worse score. Companies with the lowest score relative to their peer group (i.e., a letter score of "F") were excluded as an investment.

For sovereign issuers, the DWS ESG Quality Assessment assessed a country based on numerous ESG criteria. Indicators for environmental aspects were, for example, handling of climate change, natural resources, and vulnerability to disasters; indicators for social aspects included the attitude to child labor, equality, and prevailing social conditions; and indicators for good governance were, for example, the political system, the existence of institutions, and the rule of law. In addition, the DWS ESG Quality Assessment explicitly considered the civil and democratic liberties of a country. Sovereign issuers with the lowest score in the peer group comparison (separate groups for developed countries and emerging markets) (i.e., a letter score of "F") were excluded as an investment.

Freedom House status

Freedom House was an international non-governmental organization that classifies countries by their degree of political freedom and civil liberties. Based on the Freedom House status, countries that were labeled as "not free" by Freedom House were excluded.

Exposure to controversial sectors

Investments in companies that are involved in certain business areas and business activities in controversial areas ("controversial sectors") were excluded. Companies were excluded from the portfolio as follows, according to their share of total revenues generated in controversial sectors.

Revenue thresholds for exclusion of controversial sectors:

- Manufacturing of products and/or provision of services in the defence industry: at least 5%
- Manufacturing and/or distribution of civil handguns or ammunition: at least 5%
- Manufacturing of tobacco products: at least 5%
- Manufacturing of products in and/or provision of services for the gambling industry: at least 5%
- Manufacturing of adult entertainment: at least 5%
- Manufacturing of palm oil: at least 5%
- Nuclear power generation and/or uranium mining and/or uranium enrichment: at least 5%
- Extraction of crude oil: at least 10%
- Unconventional extraction of crude oil and/or natural gas (including oil sand, oil shale/shale gas,
- Arctic drilling): more than 0%
- Coal mining: at least 1%
- Power generation from coal: at least 10%
- Coal mining and oil extraction: at least 10%
- Power generation from and other use of fossil fuels (excluding natural gas): at least 10%
- Mining and exploration of and services in connection with oil sand and oil shale: at least 10%

The sub-fund excluded companies with coal expansion plans, such as additional coal mining, coal production or coal usage, based on an internal identification methodology.

The aforementioned coal-related exclusions only applied to so-called thermal coal, i.e., coal that is used in power stations for energy production.

DWS Use of Proceeds Bond Assessment

Deviation from the assessment approaches described above permitted an investment in bonds of excluded issuers if the particular requirements for use-of-proceeds bonds were met. In this case, the bond was first checked for compliance with the ICMA Principles for green bonds, social bonds, or sustainability bonds. Additionally, a defined minimum of ESG criteria was checked concerning the issuer of the bond, and issuers and their bonds not meeting these criteria were excluded.

DWS Target Fund Assessment

The DWS ESG database assessed target funds in accordance with the DWS Climate and Transition Risk Assessment, DWS Norm Assessment, UN Global Compact Assessment, DWS ESG Quality Assessment, the Freedom House Status, and with respect to investments in companies considered manufacturers or manufacturers of key components of anti-personnel mines, cluster munitions, chemical and biological weapons (with consideration for shareholdings within a group structure). The assessment methods for target funds were based on examining the entire target fund portfolio, taking into account the investments within the target fund portfolio. Depending on the respective assessment approach, exclusion criteria (such as tolerance thresholds) that resulted in the exclusion of the target fund were defined. Accordingly, assets were invested within the portfolios of the target funds that were not compliant with the DWS standards for issuers.

DWS exclusions for controversial weapons

Companies were excluded if they are identified as manufacturers or manufacturers of key components of anti-personnel mines, cluster munitions, chemical and biological weapons, nuclear weapons, depleted uranium weapons or uranium munitions. In addition, the shareholdings within a group structure were also taken into consideration for the exclusions. Furthermore, companies that were identified as manufacturers or manufacturers of key components of incendiary bombs containing white phosphorus were excluded.

Non-ESG assessed asset classes

Not every asset of the sub-fund was assessed by the DWS ESG assessment methodology. This applied, in particular, to the following asset classes:

Derivatives were currently not used to attain the environmental and social characteristics promoted by the sub-fund and were therefore not taken into account for the calculation of the minimum proportion of assets that comply with these characteristics. However, derivatives on individual issuers were only acquired for the sub-fund if the issuers of the underlyings complied with the DWS ESG assessment methodology.

Deposits with credit institutions were not evaluated via the DWS ESG assessment methodology.

DWS methodology for determining sustainable investments was defined in article 2 (17) SFDR (DWS Sustainability Investment Assessment)

Further, for the proportion of sustainable investments DWS measured the contribution to one or several UN SDGs via its DWS Sustainability Investment Assessment which evaluates potential investments in relation to different criteria to conclude that an investment can be considered as sustainable.

The applied ESG investment strategy did not pursue a committed minimum reduction of the scope of the investments.

The assessment of the good governance practices of the investee companies was based on the DWS Norm Assessment. Accordingly, the assessed investee companies followed good governance practices.

How did this financial product perform compared to the reference sustainable benchmark?

This sub-fund has not designated a specific reference benchmark to determine its alignment with the environmental and/or social characteristics it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

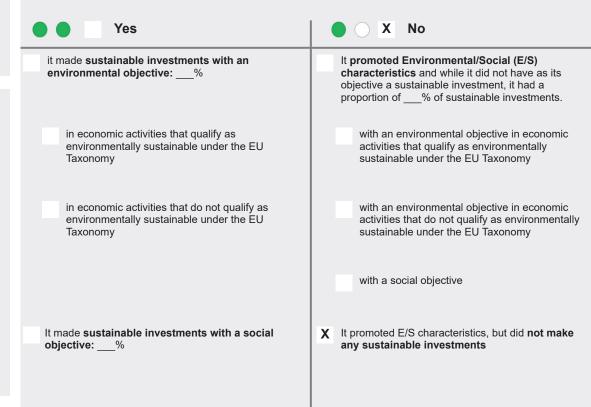

Product name: DWS Invest II Euro Bonds Conservative

Did this financial product have a sustainable investment objective?

Legal entity identifier: 2549005SJ1VQ5GX5A041

ISIN: LU2023375111

Environmental and/or social characteristics

Sustainability indicators measure

how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund promoted environmental and social characteristics related to climate, governance, and social norms as well as the political-civil freedom of a country through the avoidance of

(1) issuers exposed to excessive climate and transition risks,

(2) companies with the worst DWS Norm Assessment (i.e., as regards compliance with international standards of corporate governance, human rights, and labor rights, customer and environmental safety, and business ethics),

(3) countries flagged as "not free" by Freedom House,

(4) companies whose involvement in controversial sectors exceeds a predefined revenue threshold, and/or

(5) companies involved in controversial weapons.

This sub-fund had not designated a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted.

How did the sustainability indicators perform?

The attainment of the promoted environmental and social characteristics as well as the sustainable investment was assessed via the application of an in-house DWS ESG assessment methodology as further described in section "What actions have been taken to meet the environmental and/or social characteristics during the reference period?". The methodology applied a variety of assessment approaches that were used as sustainability indicators to assess the attainment of the promoted environmental and social characteristics, which were as follows:

•DWS Climate and Transition Risk Assessment was used as indicator for an issuer's exposure to climate and transition risks. Performance: No investments in suboptimal assets

•DWS Norm Assessment was used as indicator for a company's exposure to norm-related issues towards international standards. Performance: No investments in suboptimal assets

•Freedom House Status was used as indicator for the political-civil freedom of a country. Performance: No investments in suboptimal assets

•Exposure to controversial sectors was used as indicator for a company's involvement in controversial sectors. Performance: 0%

•DWS exclusions for controversial weapons was used as indicator for a company's involvement in controversial weapons. Performance: 0%

•DWS-Methodology for determining sustainable investments pursuant to Article 2(17) SFDR (DWS Sustainability Investment Assessment) was used as indicator to measure the proportion of sustainable investments.

Performance: 0%

Please see the section entitled "What actions were taken to meet the environmental and/or social characteristics during the reference period?" for a description of the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted, including the exclusion criteria, and the assessment methodology for determining whether and to what extent assets met the defined environmental and/or social characteristics (including the turnover thresholds defined for the exclusions). This section contains further information on the sustainability indicators.

The values from the DWS front office system are used to calculate the sustainability indicators. This means that there may be minor deviations from the other market values that appear in the annual report, which are derived from the fund accounting system.

Attainment of the promoted environmental and social characteristics at portfolio level was measured in the previous year on the basis of the following sustainability indicators:

As of: December 30, 2022

The disclosure of the sustainability indicators has been revised compared with the prior-year report. The assessment methodology is unchanged. Additional information on the currently valid sustainability indicators is provided in the section entitled "What actions were taken to meet the environmental and/or social characteristics during the reference period?"

Information about taking into account the principal adverse impacts on sustainability factors is provided in the section entitled "How did this financial product consider principal adverse impacts on sustainability factors?"

DWS ESG-Assessment Scale

In the following assessment categories, the assets received one of six possible scores, with "A" being the best score and "F" being the worst score.

riteria	Involvement in controversial sectors *(1)	Involvement in controversial weapons	Norm Assessment *(6)	ESG Quality Assessment	SDG- Assessment	Climat & Transition Risk Assessment
A	Non-involvement	Confirmed non- involvement	Confirmed no issues	True leader in ESG (>= 87.5 DWS ESG score)	True SDG contributor (>= 87.5 SDG score)	True climate leader (>= 87.5 score)
В	Remote involvement	Alleged	Violations of lesser degree	ESG leader (75-87.5 DWS ESG score)	SDG contributor (75- 87.5 SDG score)	Climate solution provider(75-87.5 score)
	0% - 5%	Dual-Purpose *(2)	Violations of lesser degree	ESG upper midfield (50-75 DWS ESG score)	SDG upper midfield (50-75 SDG score)	Low transition risk (50-75 score)
D	5% - 10% (coal: 5% - 10%)	Owning *(3)/ Owned *(4)	Violation of lesser degree	ESG lower midfield (25-50 DWS ESG score)	SDG lower midfield (25-50 SDG score)	Mod. transition risk (25-50 score)
E	10% - 25% (coal: 15% - 25%)	Component Producer *(5)	High severity or re- assessed highest violation *(7)	ESG laggard (12.5- 25 DWS ESG score)	SDG obstructer (12.5-25 SDG score)	High transition risk (12.5-25 score)
=	>= 25%	Weapon producer	Highest severity / global compact violation *(8)	True laggard in ESG (0-12.5 DWS ESG score)	Significant SDG obstructer (0-12.5 SDG score)	Excessive transition risk (0-12.5 score)

*(1) Revenue share thresholds as per standard scheme. Sub-Granularity available. Thresholds can be individually set.

*(2) Encompasses e.g., weapon-carrying systems such as combat aircraft that carry non-controversial weapons as well as controversial ones.

*(3) Owning more than 20% equity.

*(4) Being owned by more than 50% of company involved in grade E or F.

*(5) Single purpose key component.

*(6) Includes ILO controversies as well as corporate governance and product issues.

*(7) In its ongoing assessment, DWS takes into account the violation(s) of international standards – observed via data from ESG data vendors – such as the UN Global Compact, but also possible ESG data vendor errors identified, future expected developments of these violations as well as the willingness of the issuer to engage in dialogue regarding corporate decisions in this regard.

*(8) An F-grade can be considered a reconfirmed violation of the United Nations Global Compact rule framework for corporate behavior.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters. How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following principal adverse impacts on sustainability factors from Annex I of the Commission Delegated Regulation (EU) 2022/1288 supplementing the Sustainable Finance Disclosure Regulation:

• Exposure to companies active in the fossil fuel sector (no. 4);

Violations of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons) (no. 14).

For sustainable investments, the principal adverse impacts were also considered in the DNSH assessment as described above in the section "How were the indicators for adverse impacts on sustainability factors taken into account?".

DWS Invest II Euro Bonds Conservative		
ndicators	Description	Performance
Principal Adverse Impact		
PAII - 04. Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector.	0 % of assets
PAII - 10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises.	0 % of assets
PAII - 14. Exposure to controversial weapons	Share of investments in investee companies involved in the manufacture or selling of controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).	0 % of assets

Stand: 12. Dezember 2023

The Principal Adverse Impact Indicators (PAIIs) are calculated on the basis of the data in the DWS back office and front office systems, which are primarily based on the data of external ESG data providers. If there is no data on individual PAIIs for individual securities or their issuers, either because no data is available or the PAII is not applicable to the particular issuer or security, these securities or issuers are not included in the calculation of the PAII. With target fund investments, a look-through of the target fund holdings is performed if appropriate data is available. The calculation method for the individual PAI indicators may change in subsequent reporting periods due to evolving market standards, a change in the treatment of securities of certain types of instruments (such as derivatives) or as a result of regulatory clarifications.

Moreover, improved data availability may have an effect on the reported PAIIs in subsequent reporting periods.

for the period from January 1st, 2023 to December 12th, 2023

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: for the period from January 01, 2023, through December 12, 2023

What was the proportion of sustainability-related investments?

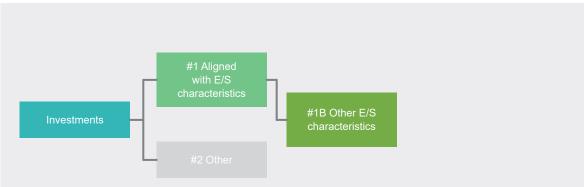

The proportion of sustainability-related investments amounted to 0% of the portfolio assets as of the merger date.

Proportion of sustainablility-related investments for the previous year: 97.81%

Asset allocation describes the share of investments in specific assets. What was the asset allocation?

This sub-fund was merged into DWS Invest ESG Floating Rates on December 12, 2023. As of the merger date, he invested 0% of his net assets in investments that were consistent with the environmental and social characteristics advertised (#1 Aligned with environmental or social characteristics).

As of the merger date, 100% of the net sub-fund assets were invested in all permitted investments for which either the DWS ESG valuation methodology was not applied or for which complete ESG data coverage was not available (#2 Other). Within this quota, all investments could be made in investments for which there was no complete data coverage with regard to the aforementioned DWS ESG assessment approaches and exclusions. Incomplete data coverage was not tolerated for assessing good corporate governance practices (using the DWS standard assessment).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

IACE- Code	Breakdown by sector according to NACE Codes	in % of portfolio volume	
С	Manufacturing	1,8 %	
J	Information and communication	0,4 %	
К	Financial and insurance activities	81,9 %	
М	Professional, scientific and technical activities	1,5 %	
NA	Other	14,3 %	

As of: 12. Dezember 2023

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Due to a lack of reliable data the sub-fund did not commit to invest a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Therefore, the promoted minimum percentage of environmentally sustainable investments aligned with the EU Taxonomy was 0% of the sub-fund's net assets. However, it may occur that part of the investments' underlying economic activities were aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

X No

The sub-fund did not take into account the taxonomy-conformity of investments in the fossil gas and/or nuclear energy sectors. Nevertheless, it might have occured that as part of the investment strategy the sub-fund also invested in issuers that were also active in these areas.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

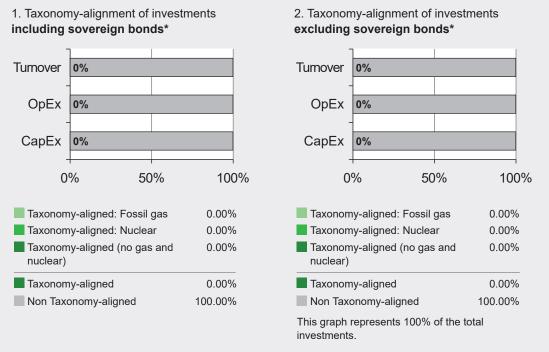

Enabling activities

Directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

Are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance. Taxonomy-aligned activities are expressed as a share of: - turnover reflecting the share of revenue from green activities of investee companies. - capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy. - operational

expenditure (OpEx) reflecting the green operational activities of investee companies. The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomyalignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The sub-fund did not have a minimum share of investments in transitional or enabling activities, as it did not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

The promoted proportion of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) was 0% of the fund's assets in the current as well as previous reference periods. It may, however, have been the case that some sustainable investments were nevertheless aligned with an environmental objective of the Taxonomy Regulation.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sub-fund did not promote a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy. There was no minimum proportion for sustainable investments with an environmental objective not aligned with the EU Taxonomy in the previous year. The total share of environmentally and socially sustainable investments therefore was 7.12%.

- What was the share of socially sustainable investments?

The sub-fund did not promote a minimum share of socially sustainable investments There was no minimum proportion for sustainable investments with an environmental objective not aligned with the EU Taxonomy in the previous year. The total share of environmentally and socially sustainable investments therefore was 7.12%.

are sustainable

investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This sub-fund promoted a predominant asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics). In addition, this sub-fund invested 100% of the sub-fund's net assets into investments for which either the DWS ESG assessment methodology was not applied or for which ESG data coverage was incomplete (#2 Other). Within this share, all investments could be invested in assets for which there was no complete data coverage with respect to the above described ESG assessment approaches and exclusions. Incomplete data was not tolerated in the assessment of good governance practices (by means of the DWS Norm Assessment).

These other investments could include all asset classes as foreseen in the specific investment policy, including deposits with credit institutions and derivatives.

Other investments could be used by the portfolio management for performance, diversification, liquidity and hedging purposes.

Minimum environmental or social safeguards were not or only partially considered for this subfund within the other investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This sub-fund pursued a strategy based on bonds as main investment strategy. At least 70% of its assets in fixed income securities, whose ultimate parent issuers were located in a member country of the OECD, the G20 states, in Singapore or in the EU. These instruments needed to be listed on exchanges or on another regulated market in a member country of the OECD, the G20 states, Singapore or in the EU that operates regularly and is recognized and open to the public. Additionally (part of the 70% quota), the sub-fund were invested in money market instruments, time deposits and cash at banks. Up to 20% of the net assets were invested in debt securities with a low credit rating (categories: BB+ to BB- from S&P and Fitch as well as Ba1 to Ba3 from Moody's) and the rest in assets with high and medium credit ratings (categories: BBB- or higher from S&P and Fitch as well as Baa3 from Moody's). Assets not denominated in EUR were generally hedged against the EUR. At least 25% of the sub-fund's assets were invested in assets that had a residual term to maturity that exceeds 24 months.

Further details regarding the main investment strategy were specified in the Special Section of the Sales Prospectus.

The sub-fund's assets were predominantly allocated into investments that complied with the defined standards in respect to the promoted environmental and social characteristics as described in the following sections. The sub-fund's strategy in relation to the promoted environmental and social characteristics was integral part of the DWS ESG assessment methodology, which was continuously monitored via the sub-fund's investment guidelines.

DWS ESG assessment methodology

The sub-fund aimed to achieve the promoted environmental and social characteristics by assessing potential assets via an in-house DWS ESG assessment methodology, regardless of their economic prospects for success and by applying exclusion criteria based on this assessment. The DWS ESG assessment methodology was based on the DWS ESG database, which used data from several ESG data providers, public sources and/or internal assessments to arrive at derived overall scores. Internal assessments took into account factors such as an issuer's future expected ESG developments, plausibility of data with regard to past or future events, the willingness to engage in dialogue on ESG matters and ESG-related decisions of a company.

The DWS ESG database derived coded scores within different assessment approaches as further detailed below. Individual assessment approaches were based on a letter scale from "A" to "F". Each issuer received one of six possible scores, with "A" representing the highest score and "F" representing the lowest score on the scale. Within other assessment approaches, the DWS ESG database provided separate assessments, including, for example, related to revenues earned from controversial sectors or the degree of involvement in controversial weapons. If an issuer's score in one assessment approach was deemed insufficient, the sub-fund was prohibited from investing in that issuer or that asset, even if this issuer or this asset would in general be eligible according to the other assessment approaches.

The DWS ESG database uses, among others, the following assessment approaches to evaluate whether issuers/assets comply with the promoted environmental and social characteristics and whether companies in which investments are made apply good governance practices:

DWS Climate and Transition Risk Assessment

The DWS Climate and Transition Risk Assessment evaluates issuers in the context of climate change and environmental changes, for example with respect to greenhouse gas reduction and water conservation. Issuers that contribute less to climate change and other negative environmental changes or are less exposed to these risks, receive better scores. Issuers with an excessive climate and transition risk profile (i.e., a letter score of "F") are excluded as an investment.

Freedom House status

Freedom House is an international non-governmental organization that classifies countries by their degree of political freedom and civil liberties. Based on the Freedom House status, countries that were labelled as "not free" by Freedom House were excluded.

Exposure to controversial sectors

Investments in companies that were involved in certain business areas and business activities in controversial areas ("controversial sectors") were excluded. Companies were excluded from the portfolio as follows, according to their share of total revenues generated in controversial sectors.

Revenue thresholds for exclusion of controversial sectors:

- Manufacturing of products and/or provision of services in the defence industry: at least 10%
- Manufacturing and/or distribution of civil handguns or ammunition: at least 5%
- Manufacturing of tobacco products: at least 5%
- · Coal mining and power generation from coal: at least 25%

• Mining of oil sand: at least 5%

The sub-fund excluded companies with coal expansion plans, such as additional coal min-ing, coal production or coal usage, based on an internal identification methodology.

The aforementioned coal-related exclusions only applied to so-called thermal coal, i.e., coal that was used in power stations for energy production. In the event of exceptional circumstances, such as measures imposed by a government to address challenges in the energy sector, the Management Company may have decided to temporarily suspend the application of the coal-related exclusions to individual companies/geographical regions.

DWS Norm Assessment

The DWS Norm Assessment evaluated the behavior of companies, for example, within the framework of the principles of the UN Global Compact, the standards of the International Labour Organization, and behavior within generally accepted international standards and principles. The DWS Norm Assessment examined, for example, human rights violations, violations of workers' rights, child or forced labor, adverse environmental impacts, and business ethics. The assessment considered violations of the aforementioned international standards. These were assessed using data from ESG data providers and/or other available information, such as the expected future developments of these violations as well as the willingness of the company to begin a dialogue on related business decisions. Companies with the worst DWS Norm Assessment score (i.e., a letter score of "F") were excluded as an investment.

DWS exclusions for controversial weapons

Companies were excluded if they are identified as manufacturers or manufacturers of key components of anti-personnel mines, cluster munitions, chemical and biological weapons, nuclear weapons, depleted uranium weapons or uranium munitions. In addition, the shareholdings within a group structure were also taken into consideration for the exclusions. Furthermore, companies that were identified as manufacturers or manufacturers of key components of incendiary bombs containing white phosphorus were excluded.

DWS Use of Proceed Bond Assessment

Deviating from the assessment approaches described above, an investment in bonds of excluded issuers was nevertheless permitted if the particular requirements for use-of-proceeds bonds were met. In this case, the bond was first checked for compliance with the ICMA Principles for green bonds, social bonds or sustainability bonds. In addition, a defined minimum of ESG criteria was checked in relation to the issuer of the bond, and issuers and their bonds that did not meet these criteria are excluded.

Issuers were excluded based on the following criteria:

- Sovereign issuers labelled as "not free" by Freedom House;
- Companies with the worst DWS Norm Assessment score (i.e., a letter score of "F");
- Companies with involvement in controversial weapons; or
- Companies with identified coal expansion plans.

DWS Target Fund Assessment

The DWS ESG database assessed target funds in accordance with the DWS Climate and Transition Risk Assessment, DWS Norm Assessment, UN Global Compact Assessment, DWS ESG Quality Assessment, the Freedom House Status and with respect to investments in companies that were considered to be manufacturers or manufacturers of key components of anti-personnel mines, cluster munitions, chemical and biological weapons (the shareholdings within a group structure were taken into consideration accordingly). The assessment methods for target funds were based on examining the entire target fund portfolio, taking into account the investments within the target fund portfolio. Depending on the respective assessment approach, exclusion criteria (such as tolerance thresholds) that resulted in exclusion of the target fund were defined. Accordingly, assets were invested within the portfolios of the target funds that were not compliant with the DWS standards for issuers.

Non-ESG assessed asset classes

Not every investment in the sub-fund has been assessed using the DWS ESG valuation methodology. This was particularly true for the following asset classes:

Derivatives were not currently used to achieve the environmental and social characteristics promoted by the Sub-Fund and were therefore not taken into account when calculating the minimum proportion of investments that met these characteristics. However, derivatives on individual issuers may only be purchased for the sub-fund if the issuers of the underlying assets meet the requirements of the DWS ESG valuation methodology. Deposits with credit institutions were not assessed using the DWS ESG valuation method.

The ESG investment strategy used did not provide for a binding minimum reduction in the size of investments.

The assessment of the good corporate governance practices of the companies in which investments were made was based on the DWS standard assessment. Accordingly, the evaluated companies in which investments were made followed good corporate governance practices.

How did this financial product perform compared to the reference sustainable benchmark?

This sub-fund has not designated a specific reference benchmark to determine its alignment with the environmental and/or social characteristics it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

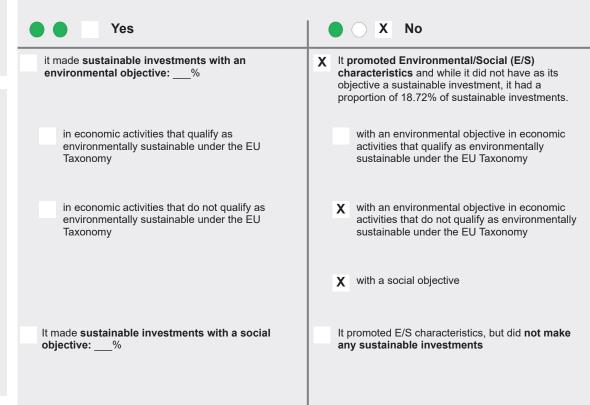

Product name: DWS Invest II Global Equity High Conviction Fund

Did this financial product have a sustainable investment objective?

Legal entity identifier: 5493007L6P1NJG33X677

ISIN: LU0826452848

Environmental and/or social characteristics

Sustainability indicators measure

how the environmental or social characteristics promoted by the financial product are attained. To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund promoted environmental and social characteristics related to climate, governance, and social norms as well as the political-civil freedom of a country through the avoidance of

(1) issuers exposed to excessive climate and transition risks,

(2) companies with the worst DWS Norm Assessment (i.e., regarding compliance with international standards of corporate governance, human rights, and labor rights, customer and environmental safety, and business ethics),

(3) countries flagged as "not free" by Freedom House,

(4) companies whose involvement in controversial sectors exceeded a predefined revenue threshold, and/or

(5) companies involved in controversial weapons.

This sub-fund further promoted a minimum proportion of sustainable investments with a positive contribution to one or several of the United Nations Sustainable Development Goals (UN SDGs).

This sub-fund had not designated a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted.

How did the sustainability indicators perform?

The attainment of the promoted environmental and social characteristics as well as the sustainable investment was assessed via the application of an in-house DWS ESG assessment methodology as further described in section "What actions have been taken to meet the environmental and/or social characteristics during the reference period? ". The methodology applied a variety of assessment approaches that were used as sustainability indicators to assess the attainment of the promoted environmental and social characteristics, which were as follows:

•DWS Climate and Transition Risk Assessment was used as indicator for an issuer's exposure to climate and transition risks.

Performance: No investments in suboptimal assets

•DWS Norm Assessment was used as indicator for a company's exposure to norm-related issues towards international standards. Performance: No investments in suboptimal assets

•Freedom House Status was used as indicator for the political-civil freedom of a country. Performance: No investments in suboptimal assets

•Exposure to controversial sectors was used as indicator for a company's involvement in controversial sectors. Performance: 0%

•DWS exclusions for controversial weapons was used as indicator for a company's involvement in controversial weapons. Performance: 0%

•DWS-Methodology for determining sustainable investments pursuant to Article 2(17) SFDR (DWS Sustainability Investment Assessment) was used as indicator to measure the proportion of sustainable investments.

Performance: 18.72%

Please see the section entitled "What actions were taken to meet the environmental and/or social characteristics during the reference period?" for a description of the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted, including the exclusion criteria, and the assessment methodology for determining whether and to what extent assets met the defined environmental and/or social characteristics (including the turnover thresholds defined for the exclusions). This section contains further information on the sustainability indicators.

The values from the DWS front office system are used to calculate the sustainability indicators. This means that there may be minor deviations from the other market values that appear in the annual report, which are derived from the fund accounting system.

Attainment of the promoted environmental and social characteristics at portfolio level was measured in the previous year on the basis of the following sustainability indicators:

As of: December 30, 2022

The disclosure of the sustainability indicators has been revised compared with the prior-year report. The assessment methodology is unchanged. Additional information on the currently valid sustainability indicators is provided in the section entitled "What actions were taken to meet the environmental and/or social characteristics during the reference period?"

Information about taking into account the principal adverse impacts on sustainability factors is provided in the section entitled "How did this financial product consider principal adverse impacts on sustainability factors?"

DWS ESG-Assessment Scale

In the following assessment categories, the assets received one of six possible scores, with "A" being the best score and "F" being the worst score.

Criteria	Involvement in controversial sectors *(1)	Involvement in controversial weapons	Norm Assessment *(6)	ESG Quality Assessment	SDG- Assessment	Climat & Transition Risk Assessment
А	Non-involvement	Confirmed non- involvement	Confirmed no issues	True leader in ESG (>= 87.5 DWS ESG score)	True SDG contributor (>= 87.5 SDG score)	True climate leader (>= 87.5 score)
В	Remote involvement	Alleged	Violations of lesser degree	ESG leader (75-87.5 DWS ESG score)	SDG contributor (75- 87.5 SDG score)	Climate solution provider(75-87.5 score)
С	0% - 5%	Dual-Purpose *(2)	Violations of lesser degree	ESG upper midfield (50-75 DWS ESG score)	SDG upper midfield (50-75 SDG score)	Low transition risk (50-75 score)
D	5% - 10% (coal: 5% - 10%)	Owning *(3)/ Owned *(4)	Violation of lesser degree	ESG lower midfield (25-50 DWS ESG score)	SDG lower midfield (25-50 SDG score)	Mod. transition risk (25-50 score)
E	10% - 25% (coal: 15% - 25%)	Component Producer *(5)	High severity or re- assessed highest violation *(7)	ESG laggard (12.5- 25 DWS ESG score)	SDG obstructer (12.5-25 SDG score)	High transition risk (12.5-25 score)
F	>= 25%	Weapon producer	Highest severity / global compact violation *(8)	True laggard in ESG (0-12.5 DWS ESG score)	Significant SDG obstructer (0-12.5 SDG score)	Excessive transition risk (0-12.5 score)

*(1) Revenue share thresholds as per standard scheme. Sub-Granularity available. Thresholds can be individually set.

*(2) Encompasses e.g., weapon-carrying systems such as combat aircraft that carry non-controversial weapons as well as controversial ones.

*(3) Owning more than 20% equity.

*(4) Being owned by more than 50% of company involved in grade E or F.

*(5) Single purpose key component.

*(6) Includes ILO controversies as well as corporate governance and product issues.

*(7) In its ongoing assessment, DWS takes into account the violation(s) of international standards – observed via data from ESG data vendors – such as the UN Global Compact, but also possible ESG data vendor errors identified, future expected developments of these violations as well as the willingness of the issuer to engage in dialogue regarding corporate decisions in this regard.

*(8) An F-grade can be considered a reconfirmed violation of the United Nations Global Compact rule framework for corporate behavior.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund partially invested in sustainable investments according to article 2(17) SFDR. Such sustainable investments contributed to at least one of the UN SDGs that related to environmental and/or social objectives, such as the following (non-exhaustive list):

- Goal 1: No poverty
- Goal 2: Zero hunger
- · Goal 3: Good health and well-being
- Goal 4: Quality education
- · Goal 5: Gender equality
- Goal 6: Clean water and sanitation
- Goal 7: Affordable and clean energy
- · Goal 8: Decent work and economic growth
- · Goal 10: Reduced inequalities
- · Goal 11: Sustainable cities and communities
- · Goal 12: Responsible consumption and production
- Goal 13: Climate action
- Goal 14: Life below water
- Goal 15: Life on land

The extent of the contribution to individual UN SDGs varied depending on the actual investments in the portfolio.

DWS determined the contribution to the UN SDGs based on its DWS Sustainability Investment Assessment, in which various criteria were used to assess the potential assets with regard to whether an investment could be considered as sustainable. As part of this assessment methodology, it was determined whether (1) an investment made a positive contribution to one or more UN SDGs, (2) the issuer passed the Do Not Significantly Harm ("DNSH") assessment and (3) the company followed good governance practices.

The DWS Sustainability Investment Assessment used data from several data providers, public sources and/or internal assessments based on a defined assessment and classification methodology to determine whether an investment is sustainable. Investments that mase a positive contribution to the UN SDGs were assessed based on revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx), depending on the asset. Where a positive contribution was determined, the investment iwas deemed sustainable if the issuer passed the DNSH assessment and the company followed good governance practices.

The share of sustainable investments as defined in article 2(17) SFDR in the portfolio was calculated in proportion to the economic activities of the issuers that qualified as sustainable. Notwithstanding the preceding, in the case of use-of-proceeds bonds that qualified as sustainable investment, the value of the entire bond was counted towards the share of sustainable investments.

The sub-fund did currently not commit to target a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The DNSH assessment was an integral part of the DWS Sustainability Investment Assessment and evaluated whether an issuer with a contribution to a UN SDG caused significant harm to any of these objectives. In case that a significant harm was identified, the issuer failed the DNSH assessment and the investment could not be considered sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the DWS Sustainability Investment Assessment systematically integrated the mandatory principal adverse indicators on sustainability factors (dependent on relevance) from Table 1 and relevant indicators from Tables 2 and 3 of Annex I of the Commission Delegated Regulation (EU) 2022/1288 supplementing the Sustainable Finance Disclosure Regulation (SFDR). Taking into account these adverse impacts, DWS had established quantitative thresholds and/or qualitative values to determine if an issuer significantly harmed any of the environmental or social objectives. These values were set based upon various external and internal factors, such as data availability or market developments and could be adapted going forward. Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

As part of its sustainability investment assessment, DWS further evaluated through its DWS Norm Assessment the alignment of a company with international norms. This included checks in relation to adherence to international norms, for example, the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the principles of the UN Global Compact and the standards of the International Labour Organization. Companies with the worst DWS Norm Assessment score (i.e., a letter score of "F") could not be considered sustainable and were excluded as an investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters. How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following principal adverse impacts on sustainability factors from Annex I of the Commission Delegated Regulation (EU) 2022/1288 supplementing the Sustainable Finance Disclosure Regulation:

- Exposure to companies active in the fossil fuel sector (no. 4);
- Violations of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons) (no. 14).

For sustainable investments, the principal adverse impacts were also considered in the DNSH assessment as described above in the section "How were the indicators for adverse impacts on sustainability factors taken into account?".

DWS Invest II Global Equity High Conviction Fund

Indicators	Description	Performance
Principal Adverse Impact		
PAII - 04. Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	9.05 % of assets
PAII - 10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0 % of assets
PAII - 14. Exposure to controversial weapons	Share of investments in investee companies involved in the manufacture or selling of controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).	0 % of assets

As of: December 29, 2023

The Principal Adverse Impact Indicators (PAIIs) are calculated on the basis of the data in the DWS back office and front office systems, which are primarily based on the data of external ESG data providers. If there is no data on individual PAIIs for individual securities or their issuers, either because no data is available or the PAII is not applicable to the particular issuer or security, these securities or issuers are not included in the calculation of the PAII. With target fund investments, a look-through of the target fund holdings is performed if appropriate data is available. The calculation method for the individual PAI indicators may change in subsequent reporting periods due to evolving market standards, a change in the treatment of securities of certain types of instruments (such as derivatives) or as a result of regulatory clarifications.

Moreover, improved data availability may have an effect on the reported PAIIs in subsequent reporting periods.

Largest investments	Breakdown by sector according to NACE Codes	in % of average portfolio volume	Breakdown by country
Alphabet CI.A	M - Professional and technical activities	9.3 %	United States
Taiwan Semiconductor Manufacturing Co.	C - Manufacturing	4.4 %	Taiwan
Samsung Electronics Co.	C - Manufacturing	4.3 %	South Korea
Booking Holdings	J - Information and communication	4.2 %	United States

Shell	M - Professional, scientific and technical 2.9 % activities		United Kingdom
VISA CI.A	K - Financial and insurance activities	2.8 %	United States
Medtronic	Q - Human health and social work activities	2.6 %	Ireland
Agilent Technologies	C - Manufacturing	2.5 %	United States
VMware Cl. A	J - Information and communication	2.5 %	United States
Adobe	J - Information and communication	2.3 %	United States
AutoZone	G - Wholesale and retail trade; repair of motor vehicles and motorcycles	2.3 %	United States

for the period from January 01, 2023, through December 29, 2023

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: for the period from January 01, 2023, through December 31, 2023

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments as of the reporting date was 96.16% of portfolio assets.

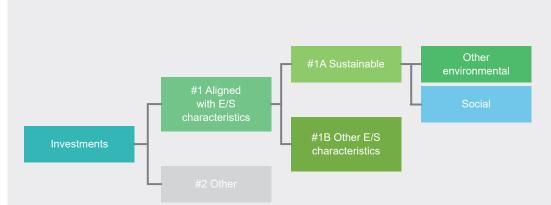

Proportion of sustainablility-related investments for the previous year: 100%

What was the asset allocation?

This sub-fund invested 96.16% of its net assets in investments that were aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 18.72% of the sub-fund's net assets qualified as sustainable investments (#1A Sustainable). Thereof the minimum share of sustainable investments with an environmental objective that were not compliant with the EU taxonomy was 2.32% and the minimum share of socially sustainable investments was 16.4%. The actual share of sustainable investments with an environmental objective that was not compliant with the EU taxonomy, and of socially sustainable investments, depended on the market situation and the investable investment universe.

3.84% of the sub-fund's net assets were invested in all permissible assets for which either the DWS ESG assessment methodology was not applied or for which ESG data coverage was incomplete (#2 Other). Within this share, all investments could be invested in assets for which there was no complete data coverage with respect to the above described ESG assessment approaches and exclusions. Incomplete data was not tolerated in the assessment of good governance practices (by means of the DWS Norm Assessment).

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

NACE- Code	Breakdown by sector according to NACE Codes	in % of portfolio volume

NA	Other	3.9 %	
xposure to c ctive in the f	ompanies ossil fuel sector	9.0 %	

DWS Invest II Global Equity High Conviction Fund

As of: December 29, 2023

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Due to a lack of reliable data the sub-fund did not commit to invest a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Therefore, the promoted minimum percentage of environmentally sustainable investments aligned with the EU Taxonomy was 0% of the sub-fund's net assets. However, it may occur that part of the investments' underlying economic activities were aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

X No

The sub-fund did not take into account the taxonomy-conformity of investments in the fossil gas and/or nuclear energy sectors. Nevertheless, it might have occured that as part of the investment strategy the sub-fund also invested in issuers that were also active in these areas.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

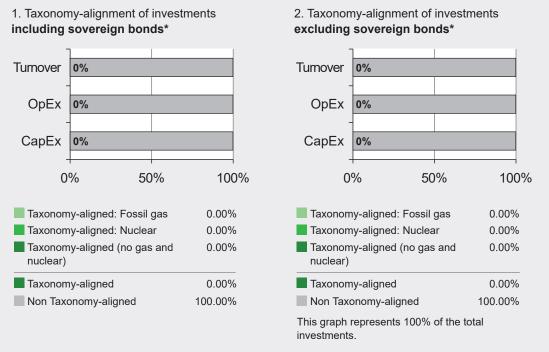

Directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

Are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance. Taxonomy-aligned activities are expressed as a share of: - turnover reflecting the share of revenue from green activities of investee companies. - capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy. - operational

expenditure (OpEx) reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomyalignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The sub-fund did not have a minimum share of investments in transitional or enabling activities, as it did not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

The promoted proportion of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) was 0% of the fund's assets in the current as well as previous reference periods. It may, however, have been the case that some sustainable investments were nevertheless aligned with an environmental objective of the Taxonomy Regulation.

are sustainable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 2.32%.

There was no minimum proportion for sustainable investments with an environmental objective not aligned with the EU Taxonomy in the previous year. The total share of environmentally and socially sustainable investments therefore was 19.38%.

What was the share of socially sustainable investments?

The minimum share of socially sustainable investments was 16.4%. There was no minimum proportion for socially sustainable investments with an environmental objective not aligned with the EU Taxonomy in the previous year. The total share of environmentally and socially sustainable investments therefore was 19.38%.

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This sub-fund promoted a predominant asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics). In addition, this sub-fund invested 3.84% of the sub-fund's net assets into investments for which either the DWS ESG assessment methodology was not applied or for which ESG data coverage was incomplete (#2 Other). Within this share, all investments could be invested in assets for which there was no complete data coverage with respect to the above described ESG assessment approaches and exclusions. Incomplete data was not tolerated in the assessment of good governance practices (by means of the DWS Norm Assessment).

These other investments could include all asset classes as foreseen in the specific investment policy, including deposits with credit institutions and derivatives.

Other investments could be used by the portfolio management for performance, diversification, liquidity and hedging purposes.

Minimum environmental or social safeguards were not or only partially considered for this subfund within the other investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This sub-fund pursued a strategy based on equities as the main investment strategy. At least 70% of the sub-fund's assets were invested in equities, stock certificates, participation and dividend right certificates, convertible bonds, American Depository Receipts (ADRs), and Global Depository Receipts (GDRs), listed on recognized exchanges and markets and issued by international financial institutions, and equity warrants of global issuers. The issuers mentioned above were companies with superior and sustainable growth perspectives. High Conviction implied that – based on the investment decision of the portfolio management – single stocks were implemented with greater weightings and less diversification than a benchmark-oriented product.

Further details regarding the main investment strategy were specified in the Special Section of the Sales Prospectus.

The sub-fund's assets were predominantly allocated to investments that complied with the defined standards in respect of the promoted environmental and social characteristics, as described in the following sections. The sub-fund's strategy in relation to the promoted environmental and social characteristics was an integral part of the DWS ESG assessment methodology, which was continuously monitored via the sub-fund's investment guidelines.

DWS ESG assessment methodology

The sub-fund aimed to achieve the promoted environmental and social characteristics by assessing potential assets via an in-house DWS ESG assessment methodology, regardless of their economic prospects for success and by applying exclusion criteria based on this assessment. The DWS ESG assessment methodology was based on the DWS ESG database, which used data from several ESG data providers, public sources and/or internal assessments to arrive at derived overall scores. Internal assessments took into account factors such as an issuer's future expected ESG developments, plausibility of data with regard to past or future events, the willingness to engage in dialogue on ESG matters and ESG-related decisions of a company.

The DWS ESG database derived coded scores within different assessment approaches as further detailed below. Individual assessment approaches were based on a letter scale from "A" to "F". Each issuer received one of six possible scores, with "A" representing the highest score and "F" representing the lowest score on the scale. Within other assessment approaches, the DWS ESG database provided separate assessments, including, for example, related to revenues earned from controversial sectors or the degree of involvement in controversial weapons. If an issuer's score in one assessment approach was deemed insufficient, the sub-fund was prohibited from investing in that issuer or that asset, even if this issuer or this asset would in general be eligible according to the other assessment approaches.

The DWS ESG database uses, among others, the following assessment approaches to evaluate whether issuers/assets comply with the promoted environmental and social characteristics and whether companies in which investments are made apply good governance practices:

DWS Climate and Transition Risk Assessment

The DWS Climate and Transition Risk Assessment evaluates issuers in the context of climate change and environmental changes, for example with respect to greenhouse gas reduction and water conservation. Issuers that contribute less to climate change and other negative environmental changes or are less exposed to these risks, receive better scores. Issuers with an excessive climate and transition risk profile (i.e., a letter score of "F") are excluded as an investment.

Freedom House status

Freedom House is an international non-governmental organization that classifies countries by their degree of political freedom and civil liberties. Based on the Freedom House status, countries that were labelled as "not free" by Freedom House were excluded.

Exposure to controversial sectors

Investments in companies that were involved in certain business areas and business activities in controversial areas ("controversial sectors") were excluded. Companies were excluded from the portfolio as follows, according to their share of total revenues generated in controversial sectors. Revenue thresholds for exclusion of controversial sectors:

- Manufacturing of products and/or provision of services in the defence industry: at least 10%
- Manufacturing and/or distribution of civil handguns or ammunition: at least 5%
- Manufacturing of tobacco products: at least 5%
- · Coal mining and power generation from coal: at least 25%
- Mining of oil sand: at least 5%

The sub-fund excluded companies with coal expansion plans, such as additional coal min-ing, coal production or coal usage, based on an internal identification methodology.

The aforementioned coal-related exclusions only applied to so-called thermal coal, i.e., coal that was used in power stations for energy production. In the event of exceptional circumstances, such as measures imposed by a government to address challenges in the energy sector, the Management Company may have decided to temporarily suspend the application of the coal-related exclusions to individual companies/geographical regions.

DWS Norm Assessment

The DWS Norm Assessment evaluated the behavior of companies, for example, within the framework of the principles of the UN Global Compact, the standards of the International Labour Organization, and behavior within generally accepted international standards and principles. The DWS Norm Assessment examined, for example, human rights violations, violations of workers' rights, child or forced labor, adverse environmental impacts, and business ethics. The assessment considered violations of the aforementioned international standards. These were assessed using data from ESG data providers and/or other available information, such as the expected future developments of these violations as well as the willingness of the company to begin a dialogue on related business decisions. Companies with the worst DWS Norm Assessment score (i.e., a letter score of "F") were excluded as an investment.

DWS exclusions for controversial weapons

Companies were excluded if they are identified as manufacturers or manufacturers of key components of anti-personnel mines, cluster munitions, chemical and biological weapons, nuclear weapons, depleted uranium weapons or uranium munitions. In addition, the shareholdings within a group structure were also taken into consideration for the exclusions. Furthermore, companies that were identified as manufacturers or manufacturers of key components of incendiary bombs containing white phosphorus were excluded.

DWS Use of Proceeds Bond Assessmen

Deviation from the assessment approaches described above was permitted for an investment in bonds of excluded issuers if the particular requirements for use-of-proceeds bonds were met. In this case, the bond was first checked for compliance with the ICMA Principles for green bonds, social bonds, or sustainability bonds. Additionally, a defined minimum of ESG criteria was checked in relation to the issuer of the bond, and issuers and their bonds that did not meet these criteria were excluded.

DWS Target Fund Assessment

The DWS ESG database assessed target funds in accordance with the DWS Climate and Transition Risk Assessment, DWS Norm Assessment, UN Global Compact Assessment, DWS ESG Quality Assessment, the Freedom House Status, and with respect to investments in companies that were considered to be manufacturers or manufacturers of key components of anti-personnel mines, cluster munitions, chemical and biological weapons (the shareholdings within a group structure were taken into consideration accordingly). The assessment methods for target funds were based on examining the entire target fund portfolio, taking into account the investments within the target fund portfolio. Depending on the respective assessment approach, exclusion criteria (such as tolerance thresholds) that result in the exclusion of the target fund were defined. Accordingly, assets were invested within the portfolios of the target funds that were not compliant with the DWS standards for issuers.

Non-ESG assessed asset classes

Not every asset of the sub-fund was assessed by the DWS ESG assessment methodology. This applies, in particular, to the following asset classes:

Derivatives were currently not used to attain the environmental and social characteristics promoted by the sub-fund and were therefore not taken into account for the calculation of the minimum proportion of assets that comply with these characteristics. However, derivatives on individual issuers were only acquired for the sub-fund if the issuers of the underlyings complied with the DWS ESG assessment methodology.

Deposits with credit institutions were not evaluated via the DWS ESG assessment methodology.

DWS methodology for determining sustainable investments was defined in article 2 (17) SFDR (DWS Sustainability Investment Assessment)

Further, for the proportion of sustainable investments DWS measured the contribution to one or several UN SDGs via its DWS Sustainability Investment Assessment which evaluates potential investments in relation to different criteria to conclude that an investment can be considered as sustainable.

The applied ESG investment strategy did not pursue a committed minimum reduction of the scope of the investments.

The assessment of the good governance practices of the investee companies was based on the DWS Norm Assessment. Accordingly, the assessed investee companies followed good governance practices.

How did this financial product perform compared to the reference sustainable benchmark?

This sub-fund has not designated a specific reference benchmark to determine its alignment with the environmental and/or social characteristics it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

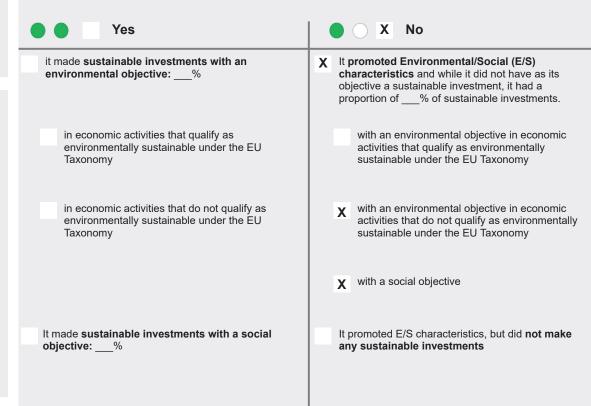

Product name: DWS Invest II Global Total Return Fund

Did this financial product have a sustainable investment objective?

Legal entity identifier: 5493002KCM1TQPN7RM50

ISIN: LU1246176181

Environmental and/or social characteristics

Sustainability indicators measure

how the environmental or social characteristics promoted by the financial product are attained. To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund promoted environmental and social characteristics related to climate, governance, and social norms as well as the political-civil freedom of a country through the avoidance of

(1) issuers exposed to excessive climate and transition risks,

(2) companies with the worst DWS Norm Assessment (i.e., regarding compliance with international standards of corporate governance, human rights, and labor rights, customer and environmental safety, and business ethics),

(3) countries flagged as "not free" by Freedom House,

(4) companies whose involvement in controversial sectors exceeded a predefined revenue threshold, and/or

(5) companies involved in controversial weapons.

This sub-fund further promoted a minimum proportion of sustainable investments with a positive contribution to one or several of the United Nations Sustainable Development Goals (UN SDGs).

This sub-fund had not designated a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted.

How did the sustainability indicators perform?

The attainment of the promoted environmental and social characteristics as well as the sustainable investment was assessed via the application of an in-house DWS ESG assessment methodology as further described in section "What actions have been taken to meet the environmental and/or social characteristics during the reference period? ". The methodology applied a variety of assessment approaches that were used as sustainability indicators to assess the attainment of the promoted environmental and social characteristics, which were as follows:

• DWS Climate and Transition Risk Assessment was used as indicator for an issuer's exposure to climate and transition risks.

Performance: No investments in suboptimal assets

• **DWS Norm Assessment** was used as indicator for a company's exposure to norm-related issues towards international standards.

Performance: No investments in suboptimal assets

• **Sovereign rating** served as an indicator of the level of controversy of sovereign issuers regarding holistic governance, such as political and civil liberties. No investments in suboptimal assets

• Exposure to controversial sectors was used as indicator for a company's involvement in controversial sectors. Performance: 0%

• **DWS exclusions for controversial weapons** was used as indicator for a company's involvement in controversial weapons. Performance: 0%

• DWS-Methodology for determining sustainable investments pursuant to Article 2(17) SFDR (DWS Sustainability Investment Assessment) was used as indicator to measure the proportion of sustainable investments.

Performance: 0%

Please see the section entitled "What actions were taken to meet the environmental and/or social characteristics during the reference period?" for a description of the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted, including the exclusion criteria, and the assessment methodology for determining whether and to what extent assets met the defined environmental and/or social characteristics (including the turnover thresholds defined for the exclusions). This section contains further information on the sustainability indicators.

The values from the DWS front office system are used to calculate the sustainability indicators. This means that there may be minor deviations from the other market values that appear in the annual report, which are derived from the fund accounting system.

Attainment of the promoted environmental and social characteristics at portfolio level was measured in the previous year on the basis of the following sustainability indicators:

As of: December 30, 2022

The disclosure of the sustainability indicators has been revised compared with the prior-year report. The assessment methodology is unchanged. Additional information on the currently valid sustainability indicators is provided in the section entitled "What actions were taken to meet the environmental and/or social characteristics during the reference period?"

Information about taking into account the principal adverse impacts on sustainability factors is provided in the section entitled "How did this financial product consider principal adverse impacts on sustainability factors?"

/ 134

DWS ESG-Assessment Scale

In the following assessment categories, the assets received one of six possible scores, with "A" being the best score and "F" being the worst score.

Criteria	Involvement in controversial sectors *(1)	Involvement in controversial weapons	Norm Assessment *(6)	ESG Quality Assessment	SDG- Assessment	Climat & Transition Risk Assessment
A	Non-involvement	Confirmed non- involvement	Confirmed no issues	True leader in ESG (>= 87.5 DWS ESG score)	True SDG contributor (>= 87.5 SDG score)	True climate leader (>= 87.5 score)
В	Remote involvement	Alleged	Violations of lesser degree	ESG leader (75-87.5 DWS ESG score)	SDG contributor (75- 87.5 SDG score)	Climate solution provider(75-87.5 score)
С	0% - 5%	Dual-Purpose *(2)	Violations of lesser degree	ESG upper midfield (50-75 DWS ESG score)	SDG upper midfield (50-75 SDG score)	Low transition risk (50-75 score)
D	5% - 10% (coal: 5% - 10%)	Owning *(3)/ Owned *(4)	Violation of lesser degree	ESG lower midfield (25-50 DWS ESG score)	SDG lower midfield (25-50 SDG score)	Mod. transition risk (25-50 score)
E	10% - 25% (coal: 15% - 25%)	Component Producer *(5)	High severity or re- assessed highest violation *(7)	ESG laggard (12.5- 25 DWS ESG score)	SDG obstructer (12.5-25 SDG score)	High transition risk (12.5-25 score)
F	>= 25%	Weapon producer	Highest severity / global compact violation *(8)	True laggard in ESG (0-12.5 DWS ESG score)	Significant SDG obstructer (0-12.5 SDG score)	Excessive transition risk (0-12.5 score)

*(1) Revenue share thresholds as per standard scheme. Sub-Granularity available. Thresholds can be individually set.

*(2) Encompasses e.g.. weapon-carrying systems such as combat aircraft that carry non-controversial weapons as well as controversial ones.

*(3) Owning more than 20% equity.

*(4) Being owned by more than 50% of company involved in grade E or F.

*(5) Single purpose key component.

*(6) Includes ILO controversies as well as corporate governance and product issues.

*(7) In its ongoing assessment, DWS takes into account the violation(s) of international standards – observed via data from ESG data vendors – such as the UN Global Compact, but also possible ESG data vendor errors identified, future expected developments of these violations as well as the willingness of the issuer to engage in dialogue regarding corporate decisions in this regard.

*(8) An F-grade can be considered a reconfirmed violation of the United Nations Global Compact rule framework for corporate behavior.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund partially invested in sustainable investments according to article 2(17) SFDR. Such sustainable investments contributed to at least one of the UN SDGs that related to environmental and/or social objectives, such as the following (non-exhaustive list):

- Goal 1: No poverty
- Goal 2: Zero hunger
- · Goal 3: Good health and well-being
- Goal 4: Quality education
- · Goal 5: Gender equality
- Goal 6: Clean water and sanitation
- Goal 7: Affordable and clean energy
- · Goal 8: Decent work and economic growth
- · Goal 10: Reduced inequalities
- · Goal 11: Sustainable cities and communities
- · Goal 12: Responsible consumption and production
- Goal 13: Climate action
- Goal 14: Life below water
- Goal 15: Life on land

The extent of the contribution to individual UN SDGs varied depending on the actual investments in the portfolio.

DWS determined the contribution to the UN SDGs based on its DWS Sustainability Investment Assessment, in which various criteria were used to assess the potential assets with regard to whether an investment could be considered as sustainable. As part of this assessment methodology, it was determined whether (1) an investment made a positive contribution to one or more UN SDGs, (2) the issuer passed the Do Not Significantly Harm ("DNSH") assessment and (3) the company followed good governance practices.

The DWS Sustainability Investment Assessment used data from several data providers, public sources and/or internal assessments based on a defined assessment and classification methodology to determine whether an investment is sustainable. Investments that mase a positive contribution to the UN SDGs were assessed based on revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx), depending on the asset. Where a positive contribution was determined, the investment iwas deemed sustainable if the issuer passed the DNSH assessment and the company followed good governance practices.

The share of sustainable investments as defined in article 2(17) SFDR in the portfolio was calculated in proportion to the economic activities of the issuers that qualified as sustainable. Notwithstanding the preceding, in the case of use-of-proceeds bonds that qualified as sustainable investment, the value of the entire bond was counted towards the share of sustainable investments.

The sub-fund did currently not commit to target a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The DNSH assessment was an integral part of the DWS Sustainability Investment Assessment and evaluated whether an issuer with a contribution to a UN SDG caused significant harm to any of these objectives. In case that a significant harm was identified, the issuer failed the DNSH assessment and the investment could not be considered sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the DWS Sustainability Investment Assessment systematically integrated the mandatory principal adverse indicators on sustainability factors (dependent on relevance) from Table 1 and relevant indicators from Tables 2 and 3 of Annex I of the Commission Delegated Regulation (EU) 2022/1288 supplementing the Sustainable Finance Disclosure Regulation (SFDR). Taking into account these adverse impacts, DWS had established quantitative thresholds and/or qualitative values to determine if an issuer significantly harmed any of the environmental or social objectives. These values were set based upon various external and internal factors, such as data availability or market developments and could be adapted going forward. Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

As part of its sustainability investment assessment, DWS further evaluated through its DWS Norm Assessment the alignment of a company with international norms. This included checks in relation to adherence to international norms, for example, the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the principles of the UN Global Compact and the standards of the International Labour Organization. Companies with the worst DWS Norm Assessment score (i.e., a letter score of "F") could not be considered sustainable and were excluded as an investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters. How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following principal adverse impacts on sustainability factors from Annex I of the Commission Delegated Regulation (EU) 2022/1288 supplementing the Sustainable Finance Disclosure Regulation:

- Carbon Foorprint (Nr. 2);
- Carbon Intensity (Nr. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violations of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons) (no. 14).

For sustainable investments, the principal adverse impacts were also considered in the DNSH assessment as described above in the section "How were the indicators for adverse impacts on sustainability factors taken into account?".

ndicators	Description	Performance
Principal Adverse Impact		
PAII - 02. Carbon Footprint - EUR	The carbon footprint is expressed as tonnes of CO2 emissions per million USD invested. The CO2 emissions of an issuer are normalised by its enterprise value including cash (EVIC).	0 tCO2e / Million EUR

for the period from January 1st, 2023 to October 26th, 2023

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: for the period from January 01, 2023, through October 26, 2023

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments as of the reporting date was 0% of portfolio assets.

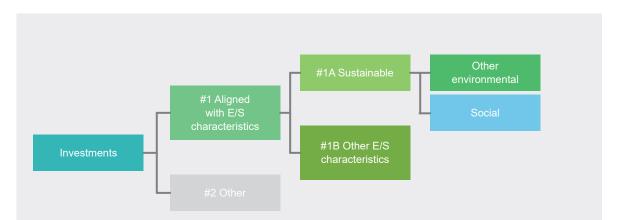

Proportion of sustainablility-related investments for the previous year: 91.62%

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

This sub-fund was liquidated on October 26, 2023. On the liquidation date he invested 0% of its net assets in investments that meet the advertised environmental and social characteristics were consistent (#1 Aligned with ecological or social characteristics). Within this category, 0% of the sub-fund's net assets qualify as sustainable investments (#1A Sustainable investments).

As of the liquidation date, 100% of the investments did not meet these characteristics (#2 Other investments).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

DWS Invest ESG Qi US Equity					
NACE- Code	Breakdown by sector according to NACE Codes	in % of portfolio volume			
Bank balances and others		100 %			
Exposure to a active in the f	companies fossil fuel sector	0 %			

As of: December 29, 2023

This sub-fund was liquidated on October 26, 2023. There were no assets in the portfolio as of the liquidation date. Therefore, no allocation of sectors could be made. Further information can be found in the asset overview in the annual report.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Due to a lack of reliable data the sub-fund did not commit to invest a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Therefore, the promoted minimum percentage of environmentally sustainable investments aligned with the EU Taxonomy was 0% of the sub-fund's net assets. However, it may occur that part of the investments' underlying economic activities were aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

X No

The sub-fund did not take into account the taxonomy-conformity of investments in the fossil gas and/or nuclear energy sectors. Nevertheless, it might have occured that as part of the investment strategy the sub-fund also invested in issuers that were also active in these areas.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

Directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

Are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance. Taxonomy-aligned activities are expressed as a share of: - turnover reflecting the share of revenue from green activities of investee companies. - capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy. - operational

expenditure (OpEx) reflecting the green operational activities of investee companies.

are sustainable

environmentally

investments with an environmental objective

that do not take into

sustainable economic activities under the Regulation (EU) 2020/852.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

What was the share of socially sustainable investments?

The sub-fund did not have a minimum share of investments in transitional or enabling activities, as it did not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sub-fund did not promote a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy. There was no minimum proportion for sustainable investments with an environmental objective not aligned with the EU Taxonomy in the previous year. The total share of environmentally and socially sustainable investments therefore was 17.71%.

The sub-fund did not promote a minimum share of socially sustainable investments

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This Sub-Fund promoted a predominant asset allocation to investments consistent with environmental and social characteristics (#1 Aligned with Environmental or Social Characteristics). In addition, this Sub-Fund was additionally invested in investments that were deemed to be non-conforming to the advertised characteristics (#2 Other Investments). These other investments could include all asset classes provided for in the relevant investment policy, including cash and derivatives.

In line with the market positioning of this Sub-Fund, the purpose of these other investments was to enable investors to participate in non-ESG compliant investments while ensuring that the majority of the exposure was investments sensitive to environmental and social characteristics were aligned. The other investments could be used by the portfolio management to optimize the investment results, for diversification, liquidity and hedging purposes.

This sub-fund did not take any minimum ecological or social protection measures into account in its other investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This sub-fund pursued a strategy based on multiple asset classes as main investment strategy. The sub-fund invested variably in interest-bearing securities, equities, financial indices, and in equity, bond and money market funds, as well as in certificates and derivatives whose underlyings were equities, bonds, and commodity, hedge fund and commodity future indices and might considering a range between 25% and 100% in equity related instruments and a range between 0% and 75% in interest-bearing securities, fixed rate and floating rate securities.

Further details regarding the main investment strategy are specified in the Special Section of the Sales Prospectus.

The sub-fund's assets were predominantly allocated into investments that complied with the defined standards in respect to the promoted environmental and social characteristics as described in the following sections. The sub-fund's strategy in relation to the promoted environmental or social characteristics was integral part of the ESG assessment methodology, which was continuously monitored via the sub-fund's investment guidelines.

DWS ESG assessment methodology

The sub-fund aimed to achieve the promoted environmental and social characteristics by assessing potential assets via an in-house DWS ESG assessment methodology, regardless of their economic prospects for success and by applying exclusion criteria based on this assessment. The DWS ESG assessment methodology was based on the DWS ESG database, which used data from several ESG data providers, public sources and/or internal assessments to arrive at derived overall scores. Internal assessments took into account factors such as an issuer's future expected ESG developments, plausibility of data with regard to past or future events, the willingness to engage in dialogue on ESG matters and ESG-related decisions of a company.

The DWS ESG database derived coded scores within different assessment approaches as further detailed below. Individual assessment approaches were based on a letter scale from "A" to "F". Each issuer received one of six possible scores, with "A" representing the highest score and "F" representing the lowest score on the scale. Within other assessment approaches, the DWS ESG database provided separate assessments, including, for example, related to revenues earned from controversial sectors or the degree of involvement in controversial weapons. If an issuer's score in one assessment approach was deemed insufficient, the sub-fund was prohibited from investing in that issuer or that asset, even if this issuer or this asset would in general be eligible according to the other assessment approaches.

The DWS ESG database uses, among others, the following assessment approaches to evaluate whether issuers/assets comply with the promoted environmental and social characteristics and whether companies in which investments are made apply good governance practices:

DWS Climate and Transition Risk Assessment

The DWS Climate and Transition Risk Assessment evaluates issuers in the context of climate change and environmental changes, for example with respect to greenhouse gas reduction and water conservation. Issuers that contribute less to climate change and other negative environmental changes or are less exposed to these risks, receive better scores. Issuers with an excessive climate and transition risk profile (i.e., a letter score of "F") are excluded as an investment.

Exposure to controversial sectors

The ESG database defined specific business areas and operations as relevant. Business areas and business activities that involved the production or distribution of products in a controversial area ("controversial sectors") were defined as relevant. For example, the civilian firearms industry, the defense industry and tobacco products were defined as controversial sectors. Other business areas and business activities that affected the production or distribution of products in other areas were defined as relevant. Other relevant areas included, for example, coal mining and coal-based energy production. Issuers were rated according to the share of total revenue they generated in controversial business areas and controversial business activities. The lower the percentage of revenue from controversial business areas and controversial business activities, the better the rating. With regard to holdings in tobacco products and civilian firearms, issuers (with the exception of target funds) with medium, high or excessive holdings (i.e. a "D", "E" or "F" rating) were excluded from investment.

With regard to participation in the defense industry, issuers (with the exception of target funds) with high and excessive participation (i.e. an "E" or "F" rating) were excluded from investment. With regard to involvement in coal mining and coal-based energy production or other controversial sectors and controversial business practices, issuers (with the exception of target funds) with excessive involvement (i.e. an "F" rating) were excluded from investment.

DWS Norm Assessment

The DWS Norm Assessment evaluated the behavior of companies, for example, within the framework of the principles of the UN Global Compact, the standards of the International Labour Organization, and behavior within generally accepted international standards and principles. The DWS Norm Assessment examined, for example, human rights violations, violations of workers' rights, child or forced labor, adverse environmental impacts, and business ethics. The assessment considered violations of the aforementioned international standards. These were assessed using data from ESG data providers and/or other available information, such as the expected future developments of these violations as well as the willingness of the company to begin a dialogue on related business decisions. Companies with the worst DWS Norm Assessment score (i.e., a letter score of "F") were excluded as an investment.

DWS state assessment

The DWS state assessment assessed the assessment of political and civil liberties. Sovereign issuers with high or excessive political and civil liberties controversies (i.e. an "E" or "F" rating) were excluded from investment.

DWS exclusions for controversial weapons

The ESG database assessed a company's involvement in controversial weapons. Examples of controversial weapons included anti-personnel mines, cluster munitions, depleted uranium weapons, nuclear weapons, chemical and biological weapons.

Issuers were assessed according to the level of their involvement (production of controversial weapons, production of components, etc.) in the production of controversial weapons, regardless of the total revenue they generated from them. Issuers (with the exception of target funds) with medium, high or excessive participation (i.e. a "D", "E" or "F" rating) were excluded from investment.

DWS Use of Proceed Bond Assessment

Deviating from the above rule, bonds that did not fully meet the criteria of the ESG assessment methodology were suitable for investment if they met the criteria of the DWS assessment of the intended use of the bond proceeds.

The financing of dedicated bonds was evaluated in a two-stage process.

In the first stage, DWS assessed whether a bond met the criteria for a dedicated bond. A key element was checking compliance with the Green Bond Principles, Social Bond Principles and Sustainability Bond Principles published by the International Capital Market Association (ICMA). The assessment focused on the use of proceeds, the selection of projects financed with those proceeds, the management of revenue-financed expenses, and annual reports to investors on the use of proceeds.

If a bond met these principles, the ESG quality of the bond issuer was confirmed in the second stage based on defined minimum standards with regard to environmental, social and corporate governance factors. This assessment was based on the ESG assessment methodology described above and excluded the following issuers:

- Companies with poor ESG quality compared to their peer group (i.e. an "E" or "F" rating),
- Sovereign issuers with high or excessive governance controversies (i.e. an "E" or "F" rating),
- · Issuers with the highest severity of norm violations (i.e. an "F" rating) or
- Issuers with excessive involvement in controversial arms deals (i.e., a "D," "E," or "F" rating).

To the extent that the sub-fund sought to achieve the advertised ecological and social characteristics as well as corporate governance practices through investments in target funds, the latter had to meet the above DWS standards with regard to climate and transition risk and norm assessment. Currently, the environmental or social characteristics promoted by the Sub-Fund have not been achieved through the use of derivatives. Derivatives were therefore not taken into account when calculating the minimum proportion of assets that met these characteristics. However, derivatives on individual issuers were only allowed to be purchased for the subfund if the issuers of the underlying instrument met the criteria of the ESG valuation methodology.

Methodology for assessing the sustainability of investments

In addition, to determine the share of sustainable investments, DWS measured the contribution to one or more UN SDGs. This was done with their sustainability assessment of investments, where potential investments were assessed against various criteria with regard to whether an economic activity could be classified as sustainable, as described in the section "What are the objectives of the sustainable investments that the financial product is intended to partially achieve." ", and how does sustainable investment contribute to these goals?"

The ESG investment strategy used did not provide for a binding minimum reduction in the size of investments.

The process for assessing the investee companies' good corporate governance practices was based on the DWS standard assessment. Accordingly, the evaluated investees followed good corporate governance practices.

In addition, the Management Company found active ownership to be a very effective means of improving corporate governance, policies and procedures and driving better long-term performance of the investee companies. Active ownership meant using the position as a shareholder to influence the activities or behavior of the investee companies. A constructive dialogue was initiated with the investees on topics such as strategy, financial and non-financial performance, risk, capital structure, social and environmental impact and corporate governance, including topics such as disclosure, culture and remuneration. A dialogue could be carried out, for example, through issuer meetings or mandate agreements. In the case of equity investments, interaction with the company was also possible through the exercise of voting rights (proxy voting) or participation in general meetings.

This sub-fund has not designated a specific reference benchmark to determine its alignment with the

environmental and/or social characteristics it promotes.

Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
