Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The Investment

No

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

What is the asset allocation planned for this financial product?

Asset allocation

describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of: - **turnover** reflecting the share of

revenue from green activities of investee companies

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

operational expenditure

(OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Does the financial product invest in fossil gas and/or nuclear energy¹ related activities that comply with the EU Taxonomy?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments 2. Taxonomy-alignment of investments including sovereign bonds* excluding sovereign bonds* Taxonomy-aligned: 0.00% Taxonomy-aligned: 0.00% Fossil gas Fossil gas Taxonomy-aligned: 0.00% Taxonomy-aligned: 0.00% Nuclear Nuclear Taxonomy-aligned (no fossil 0.00% Taxonomy-aligned (no fossil 0.00% gas and nuclear) gas and nuclear) Taxonomy-aligned 0.00% Taxonomy-aligned 0.00% Non Taxonomy-aligned 100.00% Non Taxonomy-aligned 100.00% This graph represents 100% of the total investments. *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What is the minimum share of investments in transitional and enabling activities?

Ð

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy. What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To comply with the EU

Taxonomy, the criteria

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

(F)

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
